2. T07 The right holder shall accomplish the change authorized by this transfer within one year of the date of this approval.
3. R05 Use of water under this right may be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 37-C (presently inactive).
4. To mitigate for moving the point of diversion downstream and to prevent injury to senior water right holders, 0.02 cfs of this right shall remain undiverted in Soldier Creek for conveyance loss. Also, 0.01 cfs shall continue to be diverted into the ditch starting in the SWSENE Sec. 33, T01N, R14E for conveyance loss in the ditch to avoid injury to other ditch users as a result of the approval of Transfer No. 71197.
5. 223 This water right shall be administered as being from a separate source pursuant to Basin 37 Part 2 General Provision No. 1A. If the holder of this right seeks to change the right pursuant to Idaho Code Sec. 42-222 or successor statute, nothing in this General Provision shall preclude any other person or entity from demonstrating that such a change in use would cause injury to its water right or from receiving relief provided by law in the event of injury.
6. T19 Pursuant to Section 42-1412(6), Idaho Code, this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as may be determined by the Snake River Basin Adjudication court at a point in time no later than the entry of the final unified decree.
7. X27 This right is limited to the irrigation of 1.2 acres within the place of use described above in a single irrigation season.

12. 029 Approval of Transfer No. 71197 does not authorize the construction or use of any in-stream impoundment, not existing on the date of its approval at the site of the pump diversions, in such a manner that would impede fish migration or that would increase thermal degradation on Soldier Creek. Prior to the diversion and use of water under this approval, the right holder shall screen all pump intakes with 1/4 inch or smaller mesh to prevent entrainment of fish.
13. R43 In the future, the right holder may be required to maintain measuring devices and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversions.
