Water Right 37-7758
AFTER SPLIT

9/9/2021

This is now an approved transfer, transfer number = 76658

3. amerritt 7/11/2012 amended transfer approval
The amended approval was issued in response to the petition for reconsideration. The amended approval removes the supplemental conditions for the ground water rights 37-2599, 37-2581, 37-2604, 37-2616 and 37-7758 since these rights historically have been used as the primary or sole source of water for 721.7 acres and are not supplemental to surface water use. The amended approval includes a condition that the 721.7 acres be identified as a subset of acres within the 2028.7 limited acres to be irrigated within a season within the 3345 acre permissible place of use. This condition was added to address concerns that the GW rights would not be enlarged freeing up SW to fill other SW or waste water rights incase this would ever be an issue.

Note that the other ground water rights included in the transfer retain the supplemental conditons requiring that the surface water be used first as originally drafted.

The specific 2119.9 acres to be irrigated by the right holder are shown in the electronic shape file associated with this right in the geographic information system component of the water rights database maintained by the department. Before changing the 2119.9 acres to be irrigated within the 3437.0 acre place of use, the right holder shall submit a new land list and representative electronic shape file or map to the Department prior to the irrigation season in which the change will occur.

This is now an approved transfer, transfer number = 76658
3. amerritt 7/11/2012 amended transfer approval
The amended approval was issued in response to the petition for reconsideration. The amended approval removes the supplemental conditions for the ground water rights 37-2599, 37-2581, 37-2604, 37-2616 and 37-7758 since these rights historically have been used as the primary or sole source of water for 721.7 acres and are not supplemental to surface water use. The amended approval includes a condition that the 721.7 acres be identified as a subset of acres within the 2028.7 limited acres to be irrigated within a season within the 3345 acre permissible place of use. This condition was added to address concerns that the GW rights would not be enlarged freeing up SW to fill other SW or waste water rights incase this would ever be an issue.
