The specific 2119.9 acres to be irrigated by the right holder are shown in the electronic shape file associated with this right in the geographic information system component of the water rights database maintained by the department. Before changing the 2119.9 acres to be irrigated within the 3437.0 acre place of use, the right holder shall submit a new land list and representative electronic shape file or map to the Department prior to the irrigation season in which the change will occur.
9. R05 Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No.37.
10. R43 The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversions.
11. R63 This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the place of use.
12. T07 The right holder shall accomplish the change authorized by this transfer within one year of the date of this approval.
13. T08 Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
14. T19 Pursuant to Section 42-1412(6), Idaho Code, this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as may be determined by the Snake River Basin Adjudication court at a point in time no later than the entry of the final unified decree.

37-2581, 37-2604, 37-2616 and 37-7758 since these rights historically have been used as the primary or sole source of water for 721.7 acres and are not supplemental to surface water use. The amended approval includes a condition that the 721.7 acres be identified as a subset of acres within the 2028.7 limited acres to be irrigated within a season within the 3345 acre permissible place of use. This condition was added to address concerns that the GW rights would not be enlarged freeing up SW to fill other SW or waste water rights incase this would ever be an issue.

Note that the other ground water rights included in the transfer retain the supplemental conditons requiring that the surface water be used first as originally drafted.

Water Right 37-2581

4/12/2021

8. 206 Rights 37-115F, 37-501B, 37-501C, 37-577K, 37-590B, 37-597B, 37-804, 37-2502, 37-2568, 37-2581, 37-2599, 37-2604, 37-2616, 37-7758, 37-11830, 37-20635, 37-20637, 37-20639, 37-20641, 37-20643, 37-20645, 37-20647, 37-20649, and 37-20651 are limited to the irrigation of a specific 2119.9 acres within the 3437.0 acre place of use authorized by these rights in a single irrigation season. The specific 2119.9 acres to be irrigated by the right holder are shown in the electronic shape file associated with this right in the geographic information system component of the water rights database maintained by the department. Before changing the 2119.9 acres to be irrigated within the 3437.0 acre place of use, the right holder shall submit a new land list and representative electronic shape file or map to the Department prior to the irrigation season in which the change will occur.
9. R05 Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No.37.
10. R43 The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversions.
11. R63 This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the place of use.
12. T07 The right holder shall accomplish the change authorized by this transfer within one year of the date of this approval.
13. T08 Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
14. T19 Pursuant to Section 42-1412(6), Idaho Code, this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as may be determined by the Snake River Basin Adjudication court at a point in time no later than the entry of the final unified decree.

This is now an approved transfer, transfer number = 76658
3. amerritt 7/11/2012 Amended transfer approval
The amended approval was issued in response to the petition for reconsideration. The amended approval removes the supplemental conditions for the ground water rights 37-2599, 37-2581, 37-2604, 37-2616 and 37-7758 since these rights historically have been used as the primary or sole source of water for 721.7 acres and are not supplemental to surface water use. The amended approval includes a condition that the 721.7 acres be identified as a subset of acres within the 2028.7 limited acres to be irrigated within a season within the 3345 acre permissible place of use. This condition was added to address concerns that the GW rights would not be enlarged freeing up SW to fill other SW or waste water rights incase this would ever be an issue.

Note that the other ground water rights included in the transfer retain the supplemental conditons requiring that the surface water be used first as originally drafted.
