Ken,

Here are the answers to your questions:

* Has the proper paperwork/check for the fee been received by IDWR to put our portion of the water rights into the Chariton Revocable Living Trust? **YES**

* Has the Deitz family been informed that the water rights now include the Chariton Revocable Living Trust as co-owners of the water rights #94-8280 and that I have legal access to use said well? **The Deitz family has been informed that the water rights now include the Chariton Revocable Living Trust as a current owner. The license went out in yesterday's mail to both the Deitz Living Trust and the Chariton Revocable Living Trust.**

* Has IDWR initiated any investigation into the Deitz family failure to comply with the permit application requirements - ie: the hand dug well no lower than 18' and pump in well issues? **The Department has not initiated any investigation.**

* Has your legal department, as previously stated by you, reviewed the issue of Janice Deitz signing for the extension of the application - foregoing me as the sole surviving party of the original application? **I spoke with our legal department and IDWR cannot give legal advice. You would need to hire an attorney to look into this matter.**

I will place your email and pictures in the water right file. Please let me know if you have any additional questions.

RE: Water Rights #94-8280

Jean,

When we took the prior pictures of the pump building, the Deitz family was present and we wanted to avoid an issue more than was already created in our interaction with Jan Deitz. However, we went up to the property on July 30, 2021 and took additional pictures of the actual pump mechanism inside the box/building and they are attached to this email.

Picture #1 shows the internal assembly connected to the external spiket; #2 is a close up of the pump assembly; #3 is a close up of the metal pipe mentioned in our prior letter that was initially covered with a plastic bottle - this is the pipe that just appeared without any indication of ground disturbance.

We wanted to follow up on a few items:

- * Has the proper paperwork/check for the fee been received by IDWR to put our portion of the water rights into the Chariton Revocable Living Trust?

- * Has your legal department, as previously stated by you, reviewed the issue of Janice Deitz signing for the extension of the application - foregoing me as the sole surviving party of the original application?

- * Has the Deitz family been informed that the water rights now include the Chariton Revocable Living Trust as co-owners of the water rights #94-8280 and that I have legal access to use said well?

- * Has IDWR initiated any investigation into the Deitz family failure to comply with the permit application requirements - ie: the hand dug well no lower than 18' and pump in well issues?

I appreciate your assistance into this matter and would appreciate a response regarding these matters. Thank you again.
