

## MEMORANDUM

**Date:** June 21, 2021  
**To:** Transfer 84926  
**From:** Jake Nebeker  
**Re:** Review & Evaluation of Sufficiency of Information

This transfer proposes to update ownership, change the place of use, and correct the point of diversion for water right 75-14361. The SRBA partial decree for the right (issued in 2010) contained a clerical error for the location of the point of diversion. This transfer will revise the point of diversion to reflect its historical location.

**Authority to File:**

Kendra Santini-Adams is the current water right owner of record. The applicant provided adequate documentation to show full chain of title for the current place of use. Lemhi County tax lot data shows the applicant as the current owner of the place of use. Therefore the applicant has authority to make the change. Steve Adams has authority to sign on behalf of G & NA LLC.

**Water Right Validity:**

The right included in this transfer was decreed in the SRBA in 2010. Review of 2011, 2013, 2015, and 2019 aerial photography shows growing vegetation on the current place of use. Forfeiture does not appear to be an issue.

**Injury to Other Water Rights:**

Other rights do not appear to be injured by the proposed change. The quantity authorized to be diverted will not change as a result of the transfer. No physical change will take place for the point of diversion. The Water Master for Water District 170 was notified and did not oppose the approval of this transfer. Since it is clear that the proposed change will not adversely impact other water rights, this application will not require public notice.

**Enlargement of Use:**

The proposed change does not appear to result in enlargement because neither rate nor irrigated acreage will increase as a result of the transfer.

**Local Public interest:**

No issues identified.

**Beneficial Use/Conservation of Water Resources:**

No issues identified.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
