WATER SUPPLY BANK LEASE CONTRACT No. 1426

7. Failure of the right holder to comply with the conditions of acceptance is cause for the Director to rescind acceptance of the lease.
8. Acceptance of a right into the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other Department application process.
9. In accordance with Idaho Code § 42-248 and § 42-1409(6), all owners of water rights are required to notify the Department of any changes in mailing address or change in ownership of all or part of a water right. Notice must be provided within 120 days of the change.
10. If a water right leased into the Water Supply Bank is sold or conveyed during the lease term, and if the leased right was rented, the rental proceeds will be disbursed in the following manner regardless of any arrangements between the buyer(s) and seller(s) to the contrary:
 - a. Rental payments will go to the lessor(s) of record at the beginning of the rental season, even if the Department processes a Notice of Change in Water Right Ownership during the rental season.
 - b. New lessor(s) of record will receive payment for any subsequent rental seasons.
11. The water right(s) is leased to the bank subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.
12. A lockable device subject to the approval of the Department shall be maintained on the diverting works in a manner that will provide the watermaster suitable control of the diversion.
13. The unleased portions of rights 31-12473, 31-12475, 31-12477 and 31-12479 when combined shall not exceed a total annual maximum diversion volume of 1574.6 af at the field headgate and the irrigation of 450.9 acres.
14. Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 110.
15. These rights when combined with all other rights shall provide no more than 0.03 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the place of use.
16. Upon specific notification of the Department, the right holder shall install and maintain data loggers to record water usage information at the authorized point(s) of diversion in accordance with Department specifications.
17. The unleased portion of water right 31-12477 is limited to the irrigation of 394.0 acres within the place of use described above in a single irrigation season.

13	Narrative: The Department received these applications on May 13, 2021. the applicant wishes to place a portion of each right in the Bank. These rights have the same PPU of 467 acres. Water rights 31-12475 and 31-12479 do NOT have acre limits while 31-12473 is limited to 451.1 acres and 31-12477 is limited to 408.9 acres. Because of these limits, 17.1 acres of 12475 & 12479 will be placed in the Bank and 16.5 acres of 12473 and 14.9 acres of 12477 will be place in the Bank. These acres are the pivot corners in the NENE and SENE of Section 12. These rights were decreed in 2002 and the corners have been irrigated on and off since. There are no issues with forfeiture. These are ground water rights currently within WD 110 and the ESPA GWMA.
