RECEIVED

JUL 23 2021

WATER SUPPLY BANK RENTAL AGREEMENT No. 561

DEPT OF WATER RESOURCES

This is to certify that:

SUEZ WATER IDAHO
C/O ROBERT NEWBRY
8248 W VICTORY RD
BOISE, ID 83709

filed an application to rent water from the Water Supply Bank ("Bank"). The Idaho Water Resource Board ("Board"), being authorized to operate a Bank and to contract by and through the Director of the Idaho Department of Water Resources ("Director, Department") for rental of water from the Bank, agrees to rent water as follows:

Summary of Water Rights or Portions Rented from the Bank

Water Right No.	Priority Date	Source	Diversion Rate (CFS)	Diversion Volume (AF)	Acres (AC)	Rate Per Acre (CFS/AC)	Volume Per Acre (AF/AC)
63-161BN	5/1/1866	BOISE RIVER	0.40	90.0	20.0	0.020	4.50
63-2932	3/16/1953	GROUND WATER	0.14	2.0	20.0	0.007	1.0
Combined Limit Totals			0.40	90.0	20.0	0.020	4.50
63-31833	6/1/1865	BOISE RIVER	0.19	42.8	9.5	0.020	4.51
63-123F	6/1/1864	BOISE RIVER	1.39	616	136.8	0.010	4.50
63-146	6/1/1865	BOISE RIVER	4.56	1,020	226.0	0.020	4.50
63-32593	6/1/1877	BOISE RIVER	0.43	333	74.0	0.006	4.50
63-32595	6/1/1891	BOISE RIVER	1.05	333	74.0	0.014	4.50
Combined Limit Totals			1.48	333	74.0	0.020	4.50
Combined Rental Totals			8.02	2,098.4	466.3	0.015	4.50

Term of Rental: This rental agreement shall take effect when all parties have signed it and shall continue in effect until December 31, 2021. Use of rental water shall be authorized as of either the date this rental agreement takes effect or the first day of the rental season of use, in 2021, whichever occurs last.

Annual Rental Fee:

2021: \$41,968.00

The full fee for the rental of the above-described right(s) is \$41,968.00 for 2021. The rental fee includes an administrative fee of \$4,196.80 for 2021.

Total Water Use Authorized Under Rental Agreement

Beneficial Use	Diversion Rate (CFS)	Diversion Volume (AF)	Acres (AC)
MUNICIPAL	5.52	1,630	
Combined Total	5.52	1,630	

** The authorized water usage reflects a reduction from the water right elements rented, to account for a diversion volume based on the consumptive use extent of the rented water rights, and the additive diversion rate based on a 40% reduction for Stewart Decree conditioned water rights*

Detailed water right conditions are attached.

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

WATER SUPPLY BANK RENTAL AGREEMENT No. 561

The undersigned renter agrees to use the water rented under this agreement in accordance with the Water Supply Bank rules and in compliance with the limitations and conditions of use described in this agreement:

Jarmila M. Cary 7/22/2021
Signature of Renter Date

Jarmila M. Cary Dir. of Finance and C.S., Assistant Secretary
Printed Name Title

*Title required if signing on behalf of a company or organization or with power of attorney

Having determined that this agreement satisfied the provisions of Idaho Code § 42-1763 and IDAPA 37.02.03.030 (Water Supply Bank Rule 30), for the rental and use of water under the terms and condition herein provided, and none other, I hereby execute this Rental Agreement on behalf of the Idaho Water Resource Board.

RENTAL AGREEMENT CONDITIONS OF ACCEPTANCE

1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. Use of water under this agreement does not constitute a dedication of the water to renter's place of use, and upon expiration of this agreement, the points of diversion and place of use of the water shall revert to those authorized under the water right and/or again be available to rent from the bank.
4. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
5. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
6. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.
7. Renter acknowledges and agrees that the Director may terminate authorization for the use of a water right based on a water right's priority date.
8. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
9. The places of use for this rental is described as being the location of the Columbia Village and Marden Water Treatment Facilities. However, the place of use is actually the entirety of the renter's municipal water delivery service area.

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

WATER SUPPLY BANK RENTAL AGREEMENT No. 561

10. Use of water under this agreement may be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 63.
11. The diversion of water under this rental may occur at either of Suez's two municipal water treatment facilities, provided, the combined instantaneous diversion rate of water rented through this approval shall not exceed 5.52 cfs.
12. The diversion of water under this rental, when combined with water rights 63-20041, 63-169F, 63-243E and 63-243H, is limited to a maximum diversion rate of 11.24 cfs.
13. The diversion of water under this rental, when combined with water permit 63-34109, is limited to a maximum diversion rate of 25.52 cfs.

STATE OF IDAHO
WATER RESOURCE BOARD

APPLICATION TO RENT WATER
FROM THE BOARD'S WATER SUPPLY BANK

RECEIVED
MAY 13 2021
DEPT OF WATER RESOURCES

Applicant Name: SUEZ Water Idaho Inc.

Is this application being submitted with a lease application as a lease/rental package?
If yes, specify companion water rights in Section 4

Yes ☐ No ☒

This application must be completed according to the minimum requirement checklist below. This checklist is part of the rental application and must be included with the rental application. **Applications that do not meet the minimum requirements will not be placed in the processing queue and may be returned until all minimum requirements have been met.**

Rental applications should be submitted well in advance of the desired start date for the use of rental water. Rental applications may be processed as early as November 1 of the year prior to the intended use of rental water. Any rental application received on or before November 1 for use in the next year will be assigned a received date of November 1. Rental applications submitted more than one year in advance of the proposed start date for the use of rental water will not be accepted and will be returned to applicants. Rental applications may be returned to applicants if the desired start date for the use of rental water cannot be accommodated by the Water Supply Bank. Rental requests will not be accepted once the rental season of use period has concluded.

One rental application per beneficial use of water. For multiple beneficial uses of water, separate rental requests should be submitted for each unique beneficial use of water. One rental application can be submitted if you propose to rent water from multiple sources.

For additional instructions on completing a rental application, visit the Bank's website at http://idwr.idaho.gov/water_supply_bank.

MINIMUM REQUIREMENT CHECKLIST

Check All Items as Either Attached (Yes) or Not Applicable (N/A)

Yes

- ☒ Completed *Application to Rent Water from the Board's Water Supply Bank*

Application to Rent Water (Continued)

1. CONTACT INFORMATION

- A. Applicant Suez Water Idaho Inc.
- Mailing Address 8248 W Victory Rd., Boise, ID 83709
- Street City State Zip Code
- Email Address robert.newbry@suez.com Phone Number 208-501-5042
- B. Is this application being completed by an authorized representative on behalf of the applicant? Yes ☒ No ☐
- If yes, representatives (includes company employees if the applicant is a corporation, as well as legal counsel or consultants) should provide their information below if they desire to be included on correspondence with the rental applicant.
- Representative Robert Newbry Professional Title Hydrogeologist
- Organization Suez Water Idaho Inc. Relationship to Applicant employee
- Mailing Address 8248 W Victory Rd., Boise, ID 83709
- Email Address robert.newbry@suez.com Phone Number 208-501-5042

2. MAP

Create a map of the proposed point(s) of diversion, place(s) of use and water diversion, delivery and distribution systems. Make sure the rental place of use is outlined and annotated with legal land descriptions (Township, Range, Section and Quarter-Quarters) or with GPS coordinates. For irrigation purposes, mark the number of acres you desire to irrigate. Attach the map to this application and label it **Attachment 2**.

3. DESCRIPTION OF PROPOSED USE FOR RENTAL WATER

- A. Describe why you desire to rent water and provide a detailed description of your proposed use. If the proposed use is not for irrigation, describe in detail how you determined the amount of rental water required. If the space below is insufficient, attach additional sheets as required and label them **Attachment 3A**:
- We desire to rent this water to help our storage water last through the end of the water year.
- _____
- _____

- B. Enter the desired and/or minimum rates of flow, volume, or irrigable acres requested for your rental purposes:

Desired Rate (Cubic Feet/Second)	Desired Volume (Acre-Foot)	Minimum Rate* (Cubic Feet/Second)	Minimum Volume* (Acre-Foot)	Desired Acres (if applicable)
9.9 CFS	2824.3 AF	CFS	AF	AC

* Sometimes water rights provide an exceptionally low rate per acre and/or low volume per acre. This section is meant to establish an acceptable range of water sufficient for your proposed water use. Please see question 4B and complete if necessary.

- C. This section must be completed in full. Enter the proposed start date and latest possible start date for using rental water as well as the number of years you would like to rent water. The latest possible start is the latest possible date by which you would be willing to pay for a rental and be able to benefit from utilizing rental water.

Desired Start Date (month/day/year)	Latest Possible Start Date (month/day/year)	*Mark Desired Rental Duration (Calendar Years)					**Applicant's preference if rental application cannot be processed prior to the latest possible start?	
5/31/2021	6/7/2021	☒ 1	☐ 2	☐ 3	☐ 4	☐ 5	☒ Process application as soon as possible	☐ Return application to applicant

* The number of years permissible for a rental is subject to the lease contract duration for the water right(s) being rented.

** Per Idaho Code 42-201, it is unlawful to divert or use water without a valid water right. Water Supply Bank rental applicants are not authorized to utilize rental water prior to the execution of an approved rental agreement. Rental requests may be returned to applicants if no water is available from the Bank to fulfill a rental request.

STATE OF IDAHO
WATER RESOURCE BOARD

Application to Rent Water (Continued)

- D. Describe your water distribution system and how rental water will be delivered from the point(s) of diversion (POD) to the proposed place of use (POU):

Intakes for our Marden and Columbia Surface Water Treatment Plants to our certificated municipal service area.

- E. Describe the physical type (pump, headgate, etc.) and location of the POD from which rental water is proposed to be diverted:

POD Description	Water Source	Other Water Rights Diverted from this POD
Columbia Plant	Boise River	63-31409, 63-31871
Marden Plant	Boise River and Collector Wells	63-00147D, 63-00169F, 63-00243E, 63-00243H
		63-20041

If the POD(s) above are located where water is turned into a canal, lateral or ditch, or if they are located on your property but are serviced by water that is delivered via a canal, lateral or ditch, your rental request must include documented authorization from all relevant canal companies, irrigation districts and/or water delivery entities, confirming that they consent to your diversion of water from their system.

- F. Has documented consent from all relevant water delivery entities been obtained? Yes ☐ N/A ☒
If yes, include documented consent as Attachment 3F.

- G. Do any POD(s) identified in Question 3E divert from a water source that may require water modeling? Yes ☐ No ☒
Refer to the Water Modeling Requirements Information Sheet to determine if a rental POD may require water modeling.

- H. Has water modeling been provided with your rental request? Yes ☐ N/A ☒
If yes, label modeling Attachment 3 H.
Rental applications that require modeling will be returned if modeling is not provided.

- I. Specify the desired beneficial use of water and the requested season of use or number of acres required:

- ☐ Irrigation _____ (number of acres) Duration: Subject to IDWR standard seasons of use
☐ Commercial from: _____ (mm/dd) to: _____ (mm/dd)
☐ Stockwater from: _____ (mm/dd) to: _____ (mm/dd)
☐ Industrial from: _____ (mm/dd) to: _____ (mm/dd)
☒ Other: municipal from: 5/31 (mm/dd) to: 12/31 (mm/dd)

- J. For irrigation uses, do you propose to divert water at a rate greater than 0.02 cfs/acre? N/A ☒ Yes ☐ No ☐
If yes, justify the rate of flow and attach any supporting documents as Attachment 3J. Justification may include information on soil composition, conveyance losses, crop type, irrigation systems, public access areas, etc. A rate of 0.03 cfs/acre is permissible for irrigation of 5 acres or less.

- K. Do you own the land at the proposed rental place of use (POU)? Yes ☐ No ☒
If no, attach documentation from the POU owner/operator confirming your authorization to use the POU and label it Attachment 3K.

- L. List all other water rights and sources of water at the rental place of use for the same purpose, including privately owned water rights and water received from a municipal supplier, an irrigation district, a canal company or any other water delivery entity. Explain why additional water is required:

Water rights listed above, Boise City Canal Shares and Leased, Boise Valley Irrigation Ditch Co lease, Canyon County Water Co lease, Middleton irrigation co lease, storage contracts with Anderson Ranch and Lucky Peak

STATE OF IDAHO
WATER RESOURCE BOARD

Application to Rent Water (Continued)

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☐ No ☒

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.** For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)
63-161BN	irrigation	.4	90	20		.4	90	
63-31833	irrigation	.19	42.8	9.5		.19	42.8	
63-123F	irrigation	1.39	615.6	136.8		1.39	615.6	
63-146	irrigaiton	4.6	1026	228.01		4.6	1026	
63-32593	irrigaiton	.46	333	74		.46	333	
63-32595	irrigaiton	1.05	333	74		1.05	333	
63-194	irrigaiton	1.86	393.85	85.3		1.86	393.85	
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL	CFS	AF	AC

*Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

NA

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☒ No ☐

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. If space below is insufficient, attach a separate page and label it **Attachment 4C**:

Volume limit based on historical or consumptive use will be used to assure no enlargement will occur. Most water will be used for irrigation, water that isn't used for irrigation returns to river through Boise's water treatment plants.

**STATE OF IDAHO
WATER RESOURCE BOARD**

Application to Rent Water (Continued)

5. ADDITIONAL INFORMATION

- A. Is this the first time that rental water is being requested for this purpose at the rental place of use? Yes ☒ No ☐
If no, list previous rental requests/agreements and explain why you have not secured a permanent water right for your needs:

- B. Have you or do you intend to submit an application for permit or transfer proposing a similar use as this rental? Yes ☒ No ☐
If yes, describe:
We currently have a transfer for water right 63-123F going to hearing.

- C. Was this rental application submitted in response to a Notice of Violation (NOV) or a pending NOV? Yes ☐ No ☒
If yes, describe the date and location of the NOV.

- D. Additional Information

A map of POD's and a table of the leased water rights we are seeking to rent attached.

DECLARATION

I hereby assert that the information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval. I understand that if this rental application is approved, it will be subject to the provisions of Section 42-1766, Idaho Code and all applicable state and federal laws. I understand that the submission of a rental application provides no guarantee for approval of a rental agreement. I also understand that, per Idaho Code 42-201, it is unlawful to divert or use water without a valid water right and that I am not authorized to utilize water as proposed in this application prior to the execution of an approved rental agreement.

Water Modeling Requirement Information Sheet

Information on water modeling requirements for rental requests within special administrative areas

Important information on requesting rental water within special administrative areas: Refer to the information below to determine whether the modeling of potential impacts from your rental request is necessary. Use Section 4 of the rental application to identify selected water rights. **If you submit an application to rent water from within a special administrative area and water modeling is required, your rental request will be returned if water modeling is not provided.**

Water modeling may be required when an application to rent water involves one of two scenarios:

Scenario 1: The rental request proposes to divert water from a regulated water source and/or within a special administrative area AND the distance between the rental point(s) of diversion (POD) and the POD(s) for the leased water right(s) is greater than the administratively established, acceptable distance.

Regulated water sources may areas include:

- A. Ground water resources within the modeled area of the Eastern Snake Plain Aquifer (ESPA) and tributary aquifers;
- B. Ground water within Ground Water Management Areas (GWMAs) or Critical Ground Water Areas (CGWAs);
- C. Water resources within other specified administrative areas, as established by the Idaho Water Resource Board (IWRB) or the Idaho Department of Water Resources.

The distance between any rental POD(s) and the POD(s) for a leased water right to be rented is important. On the ESPA, distance is measured in terms of model cells that cover an area of one square mile. Ground water modeling is not required if lease POD(s) and rental POD(s) are located within the same model cell or within adjacent model cells. If the lease and rental PODs are separated by more than one model cell groundwater modeling must be completed using the IDWR ESPA Transfer Tool and modeling results must be submitted with the rental application. ESPA modeling tools can be accessed and freely downloaded from IDWR's website by visiting: www.idwr.idaho.gov/WaterManagement/WaterRights/WaterRightTransfers/resources.htm.

Ground water modeling may be required within GWMAs, CGWAs or other regulated administrative areas. Applicants who desire to rent water within an established GWMA, CGWA or other regulated administrative area should consult IDWR's website before submitting their application to review the current status of administrative orders related to regulated administrative areas. Consult www.idwr.idaho.gov/WaterInformation/GroundWaterManagement/designated_areas.htm for information on GWMAs or CGWAs, visit <https://idwr.maps.arcgis.com/home/> to use mapping tools to find other regulated areas.

Applicants interested in renting water within a GWMA, CGWA or other regulated administrative areas should request water rights that have been leased into the Bank from within the same administrative area. Generally, the Bank will not permit a rental of water within a regulated administrative area if the leased water rights are not located within that same administrative area.

Scenario 2: A rental request proposes to divert water from a different but hydraulically connected water source.

Modeling situations may include:

- A. Rental requests that propose to divert surface water rights via ground water POD(s) (wells); and
- B. Rental requests that propose to divert ground water from one aquifer when the right being rented authorizes the diversion of ground water from a hydraulically connected, tributary aquifer.

Rental requests that propose to divert surface water rights from ground water points of diversion may be considered if ground water modeling establishes that the surface and ground water resources are directly and immediately hydraulically connected. An acceptable hydraulic connection occurs when at least 50 percent of the total depletions from a well are detectable from the original water source within a 24 hour period. The existing (leased) POD and proposed (rental) POD must be proximate such that diversion and use of water from the proposed POD would have substantially the same effect on the hydraulically-connected source as diversion and use of water from the original POD.

Requests to rent ground water across tributary aquifer sources may be considered if ground water modeling is provided to demonstrate that two aquifers are hydraulically connected and the anticipated impacts of diverting ground water from one source through the other is modeled accordingly.

For more information about rental application requirements, contact IDWR at (208) 287-4800.

**RE: RENTAL OF WATER FROM THE WATER SUPPLY BANK
WATER RIGHT NO(S). 63-161BN, 63-2932, 63-31833, 63-123F, 63-146, 63-32593 & 63-32595 AGREEMENTS 561**

Dear Renter:

Please find enclosed a copy of a fully executed Water Supply Bank Rental Agreement in connection with the rental of 2,098.4 acre-feet of water for municipal use during 2021. Upon receipt of this fully executed agreement, you are authorized to divert water in compliance with the conditions of water use described in the agreement.

Pursuant to the Water Supply Bank Rules, 90% or \$37,771.20 of the rental fee will be paid to the lessor(s) and 10% or \$4,196.80 will be retained by the Department to offset administrative costs.

If you have any questions, please contact this office at bank@idwr.idaho.gov or (208) 287-4800.

Sincerely,

Amanda Johnson-Veibell

for
Water Supply Bank

To: Buyer, Remington; Rex Barrie; Miller, Nick
Subject: RE: Suez Water Supply Bank Rental Agreement 561

Rex, Nick, Remington,

I have no objection to this rental however I do have an objection to extending the season of use past Oct 31st. By extending the use we will be taking water away from storage that would otherwise be there. Also when irrigation goes off in the valley most of Suez's water right's come back in priority allowing them to divert more natural flow. Suez averages about 11 CFS a day diversion in the non-irrigation season. That is my opinion and I will differ to Rex and Nick for final approval.

Subject: Suez Water Supply Bank Rental Agreement 561

Rex, Mike, Nick,

I've completed a review of Suez's recent request to rent Boise River irrigation water rights from the Water Supply Bank, to authorize municipal diversions at their Marden and Columbia Village water treatment facilities. Attached are my review memos, map and recommended rental agreement.

Please note: I've limited the rental season of use to the irrigation season as these are irrigation water rights. However, provided there is no injury to other water rights that divert outside the irrigation season of use, it may be permissible to extend the season of use for this municipal rental through the end of the year, provided the authorized diversion rates and overall diversion volumes are not exceeded. Please advise if you have any concerns or objections to allowing the season of use for this municipal rental to be extended through to December 31, 2021. Please also advise if you have any other questions, comments or concerns about the proposed rental, or if you would like to propose any additional conditions to the agreement

Thank you,

Remington

Subject: Re: Draft Rental Agreement 561

Thanks Remington - Kurt is headed up camping (lucky dog!) so I'll answer. We'll take the 5.52 cfs and 1632.1 AF. We appreciate the December 31, 2021 "deadline" that's in the draft, but even if that changes to October, we'll take the risk.

Subject: RE: Draft Rental Agreement 561

Hi Kurt,

Yes, I spoke with a few people about authorizing a 5.52 cfs for Suez and there weren't objections to that. I expect the rental agreement that will be formally provided for signature will be for 5.52 cfs.

If the rental runs only through to the end of October, Suez may not be able to fully divert the 1,632.1 af diversion volume under a 5.52 cfs diversion rate. If you wanted to request a smaller diversion volume, we could amend the rental further. However, we typically keep diversion rates and volumes proportionate for irrigation water rights, so lowering the diversion volume would also lower the diversion rate. Please let me know if Suez would like to request a lower diversion rate/volume ratio. Else, we'll produce a rental agreement with a 1,632.1 af consumptive use diversion volume and a 2,098.4 af overall diversion volume, which would require a rental payment of \$41,968.

Subject: Draft Rental Agreement 561

Kurt,

For your consideration, attached is the draft rental agreement I've submitted for comments to IDWR's water rights group and to Water District 63 staff. This agreement is in draft, so it may still be changed, however I wanted to provide you with a copy so you might have a chance to review it and to understand what might soon be before you for consideration.

For your reference, the amounts calculated as rentable for municipal purposes are calculated from the table below:

Water Right	Source	Priority Date	WSB Lease Contract	Leased Beneficial Use	Div. Rate	Volume	Acres	Rate / Acre	Vol / Acre	CU Vol, Acre
63-161BN	Boise River	05-01-1866	1088	IRRIGATION	0.400	90.0	20.0	0.020	4.5	3.5
63-31833	Boise River	06-01-1865	1250	IRRIGATION	0.190	42.8	9.5	0.020	4.5	3.5
63-123F	Boise River	06-01-1864	1219	IRRIGATION	1.385	615.6	136.8	0.010	4.5	3.5
					1.975	748.4	166.3			
63-146	Boise River	06-02-1865	1334	IRRIGATION	4.560	1,017.0	226.0	0.020	4.5	3.5

			710		1.480	333.0	74.0	0.020	4.5	3.5
Combined	Boise River			IRRIGATION	8.015	2,098.4	466.3	0.017	4.5	3.5

Please feel free to follow up with me with any questions or comments.

Remington

MEMORANDUM FOR AGREEMENT # 561

To: Water Supply Bank Rental Application 2077
From: Remington Buyer
Date: July 12, 2021
Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE: An application to rent water from the Water Supply Bank (Bank) was received by the Department of Water Resources (Department) on May 13, 2021 from Suez Water. The applicant is the municipal water provider to the City of Boise and neighboring cities. Suez is requesting a rental of Boise River water rights during 2021, to divert natural flow into their Marden and Columbia Village water treatment facilities (WTFs).

The Marden WTF is authorized to divert 5.72 cfs from the Boise River during the irrigation season under water rights 63-169F, 243E and 243H. It does not appear the Boise River water can be diverted at the Marden WTF outside of the irrigation season, unless storage water is being delivered from the reservoir storage system, or unless flood control releases are occurring.

The Columbia Village WTF can divert 20 cfs year round under permit 63-31409, provided, Boise River flows exceed 240 cfs from June 1 through February 20, or 1,100 cfs, from March 1 through May 31, at the WTF's point of diversion (POD). Suez can also divert as much as 35.2 cfs under water right 63-31871 into the Columbia Village WTF, provided, flows in the river exceed 240 cfs or 1,100 between 6/1 – 2/29 or 3/1 – 5/31, and, provided, the Bureau of Reclamation is releasing stored water for flow augmentation purposes. Effectively, if flows are not in excess of 240 cfs or 1,100 cfs during certain times of the year, Suez cannot divert water into their Columbia Village WTF, unless, they are diverting stored water called for and released from the reservoir system.

This rental of Boise River irrigation water rights presently leased to the Bank will allow Suez to increase their diversions of river water at either of the two facilities, above and beyond all diversions already authorized under water rights and water use approvals. The rental PODs are the Boise River PODs associated with the Marden and Columbia Village WTFs. The rental place of use (POU) is in fact the entire service area for Suez Water, however, for the purposes of this rental, the geospatial location recorded as the rental POU will be the Marden and Columbia Village WTFs themselves. The combined additive diversion rates and volumes for the Boise River water rights identified as rentable to Suez sum to 8.02 cfs and are as follows:

Water Right	Source	Priority Date	WSB Lease Contract	Leased Beneficial Use	Div. Rate	Volume	Acres	Rate / Acre	Vol / Acre
63-161BN	Boise River	05-01-1866	1088	IRRIGATION	0.400	90.0	20.0	0.020	4.5
63-31833	Boise River	06-01-1865	1250	IRRIGATION	0.190	42.8	9.5	0.020	4.5
63-123F	Boise River	06-01-1864	1219	IRRIGATION	1.385	615.6	136.8	0.010	4.5
					1.975	748.4	166.3		
63-146	Boise River	06-02-1865	1334	IRRIGATION	4.560	1,017.0	226.0	0.020	4.5
63-32593	Boise River	06-01-1877	710	IRRIGATION	0.430	333.0	74.0	0.006	4.5
63-32595	Boise River	06-01-1891	710	IRRIGATION	1.050	333.0	74.0	0.014	4.5
			710		1.480	333.0	74.0	0.020	4.5

With the exception of water rights 63-161NB and 31833, none of the four other Boise River water rights feature decreed diversion volume limits. However, through the lease of the water rights into the Water Supply Bank, a maximum diversion volume has been calculated, based on a regional headgate irrigation standard of 4.5 afa/ac.

Note: An additional water right (63-194) was requested for rental by Suez. However, when the application was received from Suez, Water District 63 staff notified IDWR that the Two Rivers Subdivision required a rental of water right 63-194 in 2021. Because 63-194 is appurtenant to the Two Rivers subdivision, the Water Supply Bank removed 63-194 from Suez's application.

AUTHORITY TO FILE: The application was submitted and signed by Robert "Kurt" Newbry, a hydrologist with Suez Water Idaho Inc. The application is also signed by Marshall Thompson. Mr. Thompson is listed as the Vice President of Suez in its 2021 annual report filed with the Secretary of State's Office. No concerns about authority to file.

WATER RIGHT VALIDITY: The water rights requested to be rented are valid, and there are no concerns about the validity of Suez's water rights at their WTFs.

INJURY TO OTHER WATER RIGHTS: Generally, Boise River flows decrease as the river moves west across the valley, as canals divert natural flow out of the river, until the town of Star, after which, drains bring additional water back into the river and stabilize flows. Injury is possible if Suez's diversion of Boise River water through this rental were to deprive in-priority water users of natural flow river water that they otherwise would have had access to, via their PODs on the river, situated between the water lease and rental locations, and in particular, in the reach between the Columbia Village WTF and the location of the PODs for water rights 63-32593 and 32595 (Lease Contract 710; effectively Eagle Road).

The existing locations of PODs associated with the various leased water rights contemplated to be rented to Suez are depicted as green circles in the image below (and are labeled by Water Supply Bank Contract Number). Suez's WTF rental PODs are depicted by pink circles.

Discounting water right 63-123F (Lease Contract 1219, which is fully leased into the Bank) 185 natural flow Boise River water rights divert water downstream of the Columbia Village WTF and above water rights 63-32593 and 32595. The sum diversion rate for these 185 water rights (which includes the unleased extent of water rights 63-161BN, 31833 and 146) amounts to 3,446.89 cfs, of which more than half of that is 2,000 cfs hydropower generation use authorized under water right 63-10028. Discounting hydropower use under water right 63-10028, 1,447.06 cfs is calculated as being divertible from the Boise River under the unleased extents of the 184 water rights with PODs situated between the Columbia Village WTF and Eagle Road. (See Appendix A for a list of all Boise River natural flow water rights referenced in the above calculations).

Priority water right administration by Water District 63 enables the delivery of Boise River water rights. A great deal of complexity is associated with the delivery and priority administration of water rights in the reach of the Boise River below the Columbia Village WTF and above Eagle Road. However, provided no injury is apparent in the relocation of the six water rights from their current authorized locations to the Columbia Village or Marden WTFs, it may be possible to approve a rental to Suez of all six water rights.

Additionally, the six water rights proposed to be rented all feature a common condition that restricts diversions outside the conventional irrigation season to only those times when flood control releases are happening on the Boise River. Because this is a change in nature of use rental, from irrigation to municipal use, and because municipal use is conventionally authorized year-round, it is reasonable to contemplate a diversion of water for municipal purposes through a rental of these six irrigation water rights prior to, and following the conclusion of the irrigation season, provided, no injury occurs to any other in-priority water users. It is unclear whether injury would occur if municipal diversions were to occur prior to and following the irrigation season, through a change in nature of use rental of these six irrigation water rights. At time, for the sake of expediency to allow for a rental in 2021, the question as to whether the season of use for a municipal rental should be authorize year-round diversions will not be addressed. A future rental request can further investigate that question.

ENLARGEMENT OF USE: All six water rights proposed to be rented by Suez are irrigation water rights. The regional irrigation headgate standard is 4.5 afa/acre. Based on this standard, it is reasonable to assume a 3.5 afa/acre duty of water as being the maximum consumptive use extent of these irrigation water rights. Because this rental proposes a change in nature of use from irrigation to municipal use, and because municipal use may be fully consumptive, the rental of the six water rights should be restricted to the maximum consumptive use of these water rights.

Based on a possible consumptive use extent of 3.5 afa/acre, the consumptive use extent of water rights 63-161BN, 31833, 123F, 146, 32593 and 32595 is 1,632.1 af. Four of the six water rights requested to be rented feature Stewart Decree limitations which restrict the diversion rates under the water rights to 60% of the maximum decreed diversion rates during times of scarcity. In accounting for these diversion rate reductions, the sum diversion rate for all six water rights is reduced from 8,02 cfs, to 5.52 cfs.

If Suez continuously diverts 5.52 cfs all day, everyday, for a consecutive number of days, they could exhaust the 1,632.1 af consumptive use volume in 149 days. This data is summarized in the table below:

Water Right	Source	Priority Date	WSB Lease Contract	Leased Beneficial Use	Div. Rate	Volume	Acres	Rate / Acre	Vol / Acre	CU Vol / Acre	Consumptive Use Volume	Stewart Decree Limitation?	Stewart Decree 60% Reduced Div. Rate	Stewart Decree Reduced CFS to AF/Day	Number of Days if Max Reduced Diversion Rate Pursued, Based on C/U Volume
63-161BN	Boise River	05-01-1866	1088	IRRIGATION	0.400	90.0	20.0	0.020	4.5	3.5	70.0	No, not limited	0.400	0.793	88.2

			710		1.480	333.0	74.0	0.020	4.5	3.5	259.0	Yes, limited	0.888	1.761	147.0
Combined	Boise River			IRRIGATION	8.015	2,098.4	466.3	0.017	4.5	3.5	1,632.1		5.523	10.955	149.0

The six water rights proposed to be rented to Suez authorize diversions of Boise River water during the irrigation season, from April 1st through October 31st. The water rights further allow for diversions as early as March 1st and as late as November 15th, when water is being released for flood control purposes. The period of time from April 1st through October 31st is 214 days, which is more than the 149 days within which Suez might fully divert the consumptive use extent of these leased water rights.

Presently, there are effectively 100 days left in the irrigation season and it won't be possible for Suez to fully divert the consumptive use volume of the six water rights at the maximum 5.52 cfs diversion rate. Suez could reduce the amounts of the water rights they are requesting to rent, however, that would further reduce their diversion rate. It is unclear as to whether an optimal diversion rate and diversion volume amount can be calculated for Suez for the 2021 irrigation season. Accordingly, a rental for the full amount of the six water rights is recommended and Suez can request an alteration to the rental agreement amounts if they so desire.

Finally, water right 61-161BN is stacked with supplemental ground water right 63-2932. As such, Suez will be required to rent water right 63-2932 to avoid enlargement, however, it will contribute no additional diversion rate or volume for Boise River water use.

LOCAL PUBLIC INTEREST: Suez is the regional municipal water provider to the residents of the City of Boise and surrounding communities. It is in the local public interest to allow for a municipal water right rental. Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES: The rental appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS: Review comments were requested from IDWR's Western Region and Water District 63 on July 15, 2021.

WATER SUPPLY BANK RECOMMENDATION: Contingent upon a favorable recommendation from IDWR's Western Region office and Water District 63. It is recommended this rental be approved.

Subject: SUEZ - Water bank Rental Application
Attachments: SUEZ - IDWR Water Bank Rental Application.pdf

Remington,

Thank you for your help discussing the water bank rental application process with me. Attached is our water bank rental application signed by myself as a representative and our GM Marshall Thompson. Please let me know of there is anything else I may need to do.

Another question I have is do we pay for all of the AF, just what iDWR allows us to get?

Regards,

Kurt
