This is similar to other recent small systems permitted from Jesse Creek. This is situated low on Jesse Creek and does not have any potential to injure decreed rights. Due to return flows, Jesse Ck frequently has some flow in lower reaches even later in the irrigation season. I have no concerns with approval.

One senior permit, 75-14912 is downstream. The Jesse Ck watermaster is aware of these small competing systems and will actively curtail those out of priority.

Watermaster:

The Idaho Department of Water Resources (IDWR) is seeking written comment and/or recommendations from you regarding the above referenced water right application. You can find a copy of the application at: <https://idwr.idaho.gov/apps/ExtSearch/WRAApplicationResults/>. Please review the application, then complete the enclosed recommendation form and return it to this office within 21 days of the date of this letter.

If the application is approved, IDWR will include appropriate standard conditions of approval for a water right located within a water district, such as regulation by the watermaster, lockable controlling works, and/or measuring devices. Any special conditions or other concerns you have related to this application should be specifically addressed in your recommendation.

IDWR can finish reviewing an unprotested application as soon as the protest period has past. Your prompt response to this request will ensure that your recommendation can be considered. If IDWR has not received your written recommendation within 21 days from the date of this letter, IDWR will presume that you do not oppose approval of the application and that you have no comments for IDWR to consider.

Please contact this office if you have any questions regarding the application.
