APPLICATION FOR TRANSFER OF WATER RIGHT PART 1 Continued

5. General Information:

- a. Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required now or in the future:

The diversion at the head of the ditch at Rush Creek has a waterman headgate and an electronic wier. If we need to be turned down or off it needs to be done at the headgate at Rush Creek. We will use tarps to backup the water to flood irrigate. This property has the last water right on this ditch. The ditch is also the natural drainage for the system.

- b. Who owns the property at the point(s) of diversion? Gary and Lorraine Farrens

If other than the applicant, describe the arrangement enabling the applicant to access the property for the diversion system:
Idaho law says that we can follow the ditch up to the point of diversion. As long as gates are left as they are found, the Farrens' have allowed for access to the headgate through their property.

- c. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts?
If yes, ☐ attach a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes on official letterhead signed by an authorized representative. Label it **Attachment #6**. List the name of the entity and type of lien: _____

It is the applicant's responsibility to provide notice to lien holder, trustee, mortgagor, or contract holder of the proposed changes that may impact or change the value of the water rights or affected real property. Any misrepresentation of legal encumbrance on this application may result in rejection of the application or cancellation of an approval.

- d. Are any of the water rights proposed for transfer currently leased to the Water Supply Bank?

If yes, ☐ complete Attachment WSB.

- e. Describe the effect on the land now irrigated if the place or purpose of use is changed pursuant to this transfer:

- f. Describe the use of any other water right(s) for the same purpose or land, or the same diversion system as right(s) proposed to be transferred at both the existing and proposed point(s) of diversion and place(s) use:

67-2189 is for the same land from a different source that may have reduced flows later in the irrigation season. 67-15162 is for the same land from a different source that may have reduced flows later in the irrigation season.

- g. To your knowledge, has/is any portion of the water right(s) proposed to be changed:

Yes No

|--------------------------|-------------------------------------|---|
| ☐ | ☒ | undergone a period of five or more consecutive years of non-use, |

Re: Transfer Application No. 84698

Dear Applicants,

On February 8, 2021, the Idaho Department of Water Resources (Department) received your application for a place of use (POU) transfer of water rights 67-250 and 67-301. The Department is concerned this transfer proposal will enlarge your water rights. Transfer Processing Memo No. 24.5d.(1) states "The authorized diversion rate, annual diversion volume (ground water rights and certain surface water rights), and *number of acres authorized for irrigation (if applicable), as licensed or decreed for the water right, shall not be increased.*"

Water right 67-250 authorizes 21 acres, and water right 67-301 authorizes 29 acres for a total of 50 acres combined. If you wish to pursue this transfer, please correct Item 4 on page 3 of your transfer application and show on the enclosed map the desired POU of each water right involved in your transfer.

With this letter, I included a copy of page 3 of your transfer application, an aerial map of the POU area proposed, and the proof reports of water rights 67-250 and 67-301. Please make the necessary corrections and/or additions to your application and return to me at the address listed below. Please do not hesitate to contact me with any questions you may have.

You may seek additional time to provide the information by making a written request to interrupt processing for up to six months. The application will be returned and refunded without a timely written reply within the next thirty (30) days.

Sincerely,

Anna Kaiser | Water Resource Agent
