6. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.

A. Are you requesting to rent specific water rights?

Yes ☒ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.** For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Memorandum

To: Water Rights 2-7064, 2-7237A, 2-10181 & 2-10189

From: Justin Ferguson

Date: April 13, 2021

Re: Water Supply Bank Rental Application 2014

Purpose/Narrative: An application was received from Brockway Engineering on behalf of Frank Tiegs LLC on April 4, 2021 requesting a rental of 914.5 acres, or the entirety of, water rights 2-7064, 2-7237A, 2-10181 & 2-10189. The application is intended as supplemental/companion to another rental, application 2016, for the remaining acreage owned by both Midnight Sun VIII and the Bureau of Land Management.

The water rights being requested are currently held by Crown Farm Outback and have been used for this same purpose in prior years to allow Frank Tiegs LLC to continue irrigation of the Hood Co Farm. Because these two rentals are intended to be supplemental, the total rate and volume per acre be adjusted to the area standard of 0.02 cfs/ ac and 4.0 af/ac such that they can be delivered via the same infrastructure across the entire acreage.

Authority to File: The application was submitted by Brockway Engineering and signed by Mr. Frank Tiegs. Idaho Secretary of State Information affirms Mr. Tiegs as an authorized agent for the LLC. Additionally, a land use agreement has been provided allowing Mr. Tiegs to irrigate lands held by Midnight Sun and the Bureau of Land Management. No concerns at this time.

Water Right Validity/Forfeiture Evaluation: The water rights being used to facilitate this rental are currently leased to the Bank and available for rent. No concerns at this time.

Injury Evaluation: No injury is immediately apparent through this rental as the intent is to supplement rental application number 2016 such that Mr. Tiegs can continue the established irrigation plan. It may be possible that, through this rental, there may be increased depletions of the Snake River directly impacting the Murphy and/or Weiser Gauges. In line with the prior approval, a condition will be added to the approval documents limiting diversion under this rental to times only when the minimum flows are met at both gauges. Further, as was previously noted, per Water Supply Bank Rules 30.1 (IDAPA 37.02.03.30.1), the IWRB may petition the Director of IDWR to modify the rental upon a showing of injury to its minimum streamflow water rights.

Enlargement of Use: The rental will be calibrated to match both the rate and volume per acre such that the water can be delivered via the same infrastructure at the same time across the entire acreage without causing enlargement between both rentals. Additionally, a portion of the acreage is also covered under other rentals from the Bank that expire throughout the duration of this agreement. It can be inferred that, based on the established irrigation practices, the Bank will receive updated applications that are effectively continuations of prior agreements to continue irrigating the entire farm and should be adjusted in line with the area standards to prevent a possibility of enlargement.

Local Public Interest: Staff are unaware of any local public interests that are averse to the rental.

Beneficial Use/Conservation of Water Resources: The rental appears consistent with the conservation of water resources in Idaho.

Department/Watermaster Comments: Watermaster for district 37 and IDWR Southern Region comments were requested on

Water Supply Bank Evaluation: Provided there are no concerns or comments received, Bank staff recommend the approval of this application for Mr. Tiegs for the Hood Co. Farm for the duration requested in the application package.
