RE: Seefried Ranch, LLC Transfer

To Whom It May Concern,

Seefried Ranch, LLC has applied to transfer 11 acres worth of water from our well right 34-2356 to our well right 34-7171. The 11 acres that we are applying to transfer are the corners of 2 pivots that we own. Both of these corners were irrigated using wheel lines prior to 2009. Pivots were installed & these two corners did not fit under the pivots. Both corners had ditches extended to them in an attempt to irrigate them. The south pivot still has the ditch running to it. The pivot to the north had the ditch filled in recently when the crop was reseeded into alfalfa. The surface water right to the entire property is impossible to get delivered in a reliable fashion, but multiple attempts have been made to use that surface right to irrigate both of these corners. Even if the surface right is on, the ditch that delivers the water is in really poor shape plus, we are the last right on this ditch. We have tried multiple times to clean & seal it. We requested & finally received help from the irrigation district in cleaning this ditch, but it still leaks a tremendous amount. As recently as last fall, we used our backhoe to build up the bank to get our water to our property. The other corners are irrigated using portable mainline, multiple handlines & a short wheel line. The 2 corners in question cannot have mainline ran to them, so cannot make use of handlines.

We believe the defense to forfeiture of the portion of this right that is appurtenant to these corners falls under Idaho Statute 42-223 (6) which states that, "No portion of a water right shall be lost or forfeited for nonuse if the nonuse results from circumstances over which the water right owner has no control." Again, we have tried multiple times to irrigate both of these corners but have found it impossible to do. Hence, the need to transfer this portion to a piece of similarly sized property that can be irrigated & make use of this portion of our right.

Sincerely,

Holly Seefried
