

MEMORANDUM

Date: April 30, 2021
To: Transfer 84802
From: Cooper Fritz
Re: Review & Evaluation of Sufficiency of Information

This transfer changes the place of use and point of diversion for a 13.4-acre portion of right 29-14015.

Authority to File:

The applicants, Conrad and Adriane Isaak, have the authority to file. Both applicants signed the application.

At the time of transfer submittal, the water right was owned by the applicants, according to the Department's database.

The post transfer place of use and point of diversion were owned by Power County Airport, according to Power County taxlot data. An Agreement for Purchase and Sale of Water Rights, signed by Ron Funk, Power County Commissioner, consents to the placement of water right on the land. Ownership of the water right will be updated upon transfer approval.

Water Right Validity:

The water right is valid for transfer. It was decreed in 2004. At the time of transfer submittal it was released to the Idaho Water Supply Bank ("WSB"). The WSB was notified of the transfer prior to advertising.

Injury to Other Water Rights:

No other water rights will be injured as a result of this transfer. A simulation of the transfer was performed in EPSAM2.1. It yielded impacts to modeled impacts of the Snake River of less than 2.0 AF/trimester. Therefore, no mitigation is required. The Watermaster for Water District 120 was notified of the transfer and did not object to its approval. The transfer was advertised and no protests were received.

Enlargement of Use:

No enlargement of use will result from this transfer's approval. Rate, volume, nor irrigated acres are authorized to increase. Companion transfer 84947 was submitted concurrently on right 29-14015. The remainder of right 29-14015 is presented in this transfer's approval as altered by both transfers, which were approved at the same time.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
