5. **CHANGE OF WATER RIGHT:** This lease specifies water right elements including but not limited to: diversion rates; diversion volumes; number of acres authorized to be irrigated; places of use; points of diversion; beneficial uses; and seasons of use. During the term of this lease, if a water right is administratively changed due to a water right split and renumbering, this lease may be reduced by an equal amount to reflect the water right elements as legally defined under the water right. Memorandum

To: Water Rights 17-7007, 17-2028, 17-2030, 17-2045, 17-2052 & 17-7063
From: Justin Ferguson
Date: May 3, 2021
Re: Water Supply Bank Lease Applications 1998 & 2000

Purpose/Narrative: Two applications were received March 3, 2021 from Brockway Engineering PLLC on behalf their client, Holbrook Farms as part of a lease rental package using water rights 17-7007, 17-2028, 17-2030, 17-2045, 17-2052 & 17-7063 to facilitate a rental for CSS Potato Farms.

The applications are effectively a renewal of prior agreements enabling CSS Potato the use of portions of these rights that Holbrook Farms does not intend to use. It was found that, during the review of these two applications, more acreage was observed as vegetated using satellite imagery than was authorized under the Holbrook Farms water right portfolio. Per Appendix A, the possible overage was across the land covered by water rights 17-2052 & 17-7063 by, on average, 150 acres.

The applicant's representative was contacted and an information request submitted to the applicant for further information regarding the additional acreage. Per an email provided April 12, 2021: there are not end guns on the pivot systems, there are no hand lines in use throughout the farm, and only a single wheel line is used. Further, it was stated that when a field has been harvested and the pivots moved to another location, grain is planted and the area dryland farmed or are left fallow.

Based on a review of both satellite and aerial data, it appears an initial crop is harvested at some point during the late spring/early summer on the acreage where the possible enlargement is occurring. Because there are no end guns installed, the irrigation observed at the corners of the pivot systems could possibly amount to overspray and unintentional irrigation and the vegetation observed as pasture grass. Taking into account the size of the observed pivot and the additional irrigated acreage, a total of approximately 192 acres is observed as intentionally irrigated.

Authority to File: The applications were prepared at Brockway Engineering PLLC and signed by Ms. Gabriele Onorato. Provided in the application packages is an Action of Managers and Directors outlining the scope of Ms. Onorato's authority as related to her authority to sign. No concerns at this time.

Water Right Validity/Forfeiture Evaluation: Historically, water right 17-2052 was developed in 1973 while water rights 17-2028 & 17-2030 were decreed in 1979. Right 17-2045 followed with a decree in 1982 and 17-7007, 17-2063 in 1983. During prior reviews of the water rights it was found that vegetation was observed using both aerial imagery and Climate Engine MAX NDVI data in 2015, 2016 & 2017. These conclusions were affirmed during this review and, with the additional information provided in the email from the applicant's representative, further confirm that the portions offered for lease remain valid and can be considered for lease to the Bank.

Injury Evaluation: Based on both the lease proposal and the accompanying rental, there do not appear to be any concerns of injury. The lessor has elected to idle portions of their land that they are not planning to irrigate within the Curlew Valley Critical Ground Water Area (CVCGWA) while the proposed renter's place of use also falls within the CVCGWA.

Enlargement of Use: No enlargement is evident leasing water rights 17-2028, 17-2030, 17-2045 & 17-7007 and making them available for rent to CSS Potato Farms. Figure 1 below outlines the decreed rates, volumes, and acreage for each right and the associated amounts offered for lease to the Bank:

Figure 1. Amounts proposed for lease under application number 2000

From a review of the amounts proposed for lease under water rights 17-2058 & 17-7063, further information was necessary such that the rights could be leased without causing enlargement. Based on lease contracts from 2017, 2019 & 2020 it appears the acreage has continually been listed incorrectly on the application. In line with the prior applications and approvals, the acreage has been adjusted to more correctly match the intent of the application:
