RENTAL AGREEMENT CONDITIONS OF ACCEPTANCE

1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. Use of water under this agreement does not constitute a dedication of the water to renter's place of use, and upon expiration of this agreement, the points of diversion and place of use of the water shall revert to those authorized under the water right and/or again be available to rent from the bank.
4. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
5. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
6. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.
7. Renter acknowledges and agrees that the Director may terminate authorization for the use of a water right based on a water right's priority date.
8. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
9. This rental does not authorize construction of a well.
10. Use of water under this agreement may be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 37.
11. This right when combined with all other rights shall provide no more than 0.03 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the place of use.

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☐ No ☒

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.** For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)
						0.03	4.6	1.3
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL	.03	4.6	1.3
						CFS	AF	AC

*Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

N/A.

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☐ No ☒

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. Memorandum

To: Water Supply Bank Application
From: Justin Ferguson
Date: January 25, 2021
Re: Water Supply Bank Rental Application 1902

Purpose/Narrative: An application was received December 23, 2020 from Brockway Engineering on behalf of Mr. Jack Schneider requesting a rental of groundwater for the irrigation of 1.3 acres, for a period of five years. No specific water rights were requested.

Mr. Schneider's rental location is in the upper reaches of the Warm Springs Creek drainage, above Ketchum, in basin 37. The only ground water right available for rental to Mr. Schneider is 37-11550, which authorizes diversions of ground water just south of Ketchum. This water right is leased to the Bank through 2023 and a three year rental of this water right is being considered for Mr. Scheider.

Authority to File: The application was prepared by the applicant's representative at Brockway Engineering and signed by Mr. Jack Schneider. Review of Blaine County parcel data indicates Mr. Schneider as the current land owner. No concerns of the applicant's authority to file at this time.

Water Right Validity/Forfeiture Evaluation: The water rights being requested are leased to the Bank and there are no concerns about their validity.

Injury Evaluation: No injury is apparent under this rental. The movement of ground water right 37-11550 from its authorized location below Ketchum, to the rental location, will result in a slight increase in the volume of water available in the main of the Wood River Valley aquifer (which will benefit surface water flows in the Big Wood River), and it will cause a slight decrease in the ground water volume available below Warm Springs Creek (which could decrease flows in Warm Springs Creek). Staff are unaware of any concerns regarding the administration of Warm Springs Creek surface water. Further, any potential impacts to Warm Springs Creek attributable to this rental might be mitigated by a rental of water rights 37-2055 and 37-11445 under Contract 967).

Enlargement of Use: Water right 37-11550 is combined with Clear Creek surface water right 37-458A. To avoid enlargement, a proportionate amount of both 37-458A and 11550 will be rented together, to allow for the requisite diversion volume under 37-11550 to be the basis for this rental.

Local Public Interest: Staff are unaware of any local public interests that are averse to the rental.

Beneficial Use/Conservation of Water Resources: Irrigation is a beneficial use and it is expected that irrigation use will be consistent with water conservation practices.

Department/Watermaster Comments: Comments were requested from IDWR's Southern Region and Water District 37 on 3/24/2021, no concerns were received.

Water Supply Bank Evaluation: Bank staff recommend the approval of this application.
