RECITALS

1. The Board is authorized under chapter 17, title 42, Idaho Code to operate a water supply bank and to contract with lessors to act as an intermediary in facilitating the rental of water.
2. The Lessor has filed a completed application to lease water rights described below into the Water Supply Bank on forms supplied by the Idaho Department of Water Resources and received by the Department on December 09, 2020.

5. **CHANGE OF WATER RIGHT:** This lease specifies water right elements including but not limited to: diversion rates; diversion volumes; number of acres authorized to be irrigated; places of use; points of diversion; beneficial uses; and seasons of use. During the term of this lease, if a water right is administratively changed due to a water right split and renumbering, this lease may be reduced by an equal amount to reflect the water right elements as legally defined under the water right. If a lease contract cannot be reduced sufficient to reflect the legal definition of a water right as amended through a water right split and/or water right transfer, the Board may release the water right from the Water Supply Bank.

1. The water rights referenced above will be rented from the bank at the current rental rate.
2. There is no rental payment to the lessor of the water right if the right or a part thereof is not rented from the bank.
3. While a right is in the bank, the lessor may not use the right without approval of the Department even if the right is not rented from the bank. WATER SUPPLY BANK LEASE CONTRACT No. 1294

8. Acceptance of a right into the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other Department application process.
9. In accordance with Idaho Code § 42-248 and § 42-1409(6), all owners of water rights are required to notify the Department of any changes in mailing address or change in ownership of all or part of a water right. Notice must be provided within 120 days of the change.
10. If a water right leased into the Water Supply Bank is sold or conveyed during the lease term, and if the leased right was rented, the rental proceeds will be disbursed in the following manner regardless of any arrangements between the buyer(s) and seller(s) to the contrary:
 - a. Rental payments will go to the lessor(s) of record at the beginning of the rental season, even if the Department processes a Notice of Change in Water Right Ownership during the rental season.
 - b. New lessor(s) of record will receive payment for any subsequent rental seasons.
11. The water right(s) is leased to the bank subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.
12. After specific notification by the Department, the right holder shall install a suitable measuring device or shall enter into an agreement with the Department to use power records to determine the amount of water diverted and shall annually report the information to the Department.
13. The period of use for the irrigation described in this approval may be extended to a beginning date of 3/1 and an ending date of 11/15 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 4/1 and after 10/15 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than 5/2/2008.
14. Rights 63-32968 and 63-32970 can't be rented unless portions of rights 63-32967 and 63-32969 are leased.

Subject: RE: transfer 83851

Jean:

Here is the scoop: Bartlows filed a Transfer application to split their portion off of 63-32968 and 63-32970. The application was initially incompletely entered as 83581, but then we processed the split and created 63-34786 and 63-34787 and processed the transfer application under application ID 83585, but did not close out the erroneous 83581... some other goofy things happened and 63-32968 was, for a time, shown with Bartlow as the owner. Good news is that all of this has been corrected and we have no currently pending transfers for the Deersky rights.

The bad news is that I am not sure whether you can accept 63-32968 and 63-32970 into the bank (even though it sounds like they have been in the bank already). Deersky's name is on the rights, but all of the land (except maybe the roads) is owned by the lot owners and Deersky did not reserve ownership of the rights. The lot owners have been slowly trickling in to file ownership changes and transfers to assert ownership of their portions and divert from their own wells over the past several years. Maybe the actual ownership doesn't matter, since the rights are still in Deersky's name, but I thought I would mention it in case it does.

Nick.

This one has been on my radar for a while – I think we had some kind of mixup with an ownership change and transfer(s) that all happened about the same time. I'll bring you my list and notes and we'll get it sorted out so we can get an answer back to Jean so she has it when she returns to the office on the 4th.

But InfoSearch shows a Status of Active-DATA ENTRY INCOMPLETE. There is nothing scanned to the file related to the transfer at all.

Thoughts Nick?

In the name of Bartlow for water right 63-32968

Deersky Ranch is the current owner of this water right and has applied to place this right back in the Bank for another 5 years. There is a transfer pending that was filed in September of 2019. What is the status of this transfer?

I need to know if I can place the entire right in the Bank.
