ACTION OF THE DEPARTMENT OF WATER RESOURCES

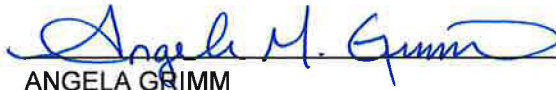

The Idaho Department of Water Resources hereby approves the above Application for Amendment for Permit No. 34-7247 with the following:

Conditions of Approval

1. This right is limited to the irrigation of 168 acres within the authorized place of use in a single irrigation season.
2. Rights 34-2428, 34-7247, and 34-12416 when combined shall not exceed a total diversion rate of 8.23 cfs from the well located in the NWSENE, Sec. 05, T04N, R26E (known as the Middle Well).
3. Diversion and use of water from the well located in NWSENE, Sec. 5, T04N, R26E (known as the Middle Well) under the following water rights shall be limited to the diversion of 1,953 acre-feet/annum; 34-2332, 34-2424B, 34-2428, 34-7035B, 34-7052, 34-7079, 34-7247, 34-12416, and 34-13841.
4. Rights 34-496A, 34-692D, 34-2428, 34-7035B, 34-7247, and 34-12416 when combined shall not exceed the irrigation of 945 acres.
5. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the place of use.
6. Use of water under this right may be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 34.
7. Distribution of water for use under this right shall be in accordance with the Water District 34 rules including requirements for mitigation as therein provided. If mitigation is not provided to avoid injury to existing rights, the well shall be reconstructed to prevent water from any depth less than 300 feet from entering the well.
8. The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion(s).
9. The issuance of this right does not grant any right-of-way or easement across the land of another.

This amendment is issued pursuant to the provisions of Idaho Code § 42-211.

Signed this 21st day of APRIL, 2021.

5. **Describe the proposed change in narrative form:**

This permit was issued to cover an existing use of water but the application approval was delayed until 1999 during a period the IDWR was making recommendations for water rights in this basin to the SRBA Court. As part of those recommendations and ultimate decrees, several water rights, 34-2428, 34-7035B, 34-12416, 34-496A and 34-692D were decreed with a PPU that includes most of the POU covered by this permit. This amendment seeks to modify the POU description of this water right to match the PPU decreed in the SRBA and match the way this water is used. Adding this water right to the PPU will not increase the number of acres in the PPU but the water supply from this right is essential to make the water supply for the PPU be adequate with the delivery system currently in place. The existing rights for this PPU have a total diversion rate of 11.23 cfs. With the addition of the 4.49 cfs from this right the total is 15.72 cfs but is still less than the 18.90 cfs that would be required to provide 0.02 cfs/acre.

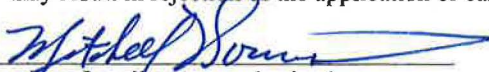

6. **Map:**

☐ The point(s) of diversion and/or the place of use are not amended, therefore a map is not attached.

Attach a map showing the proposed point(s) of diversion and/or places(s) of use. Clearly label the map with Township, range, section, and $\frac{1}{4}$ $\frac{1}{4}$ of section information. A photocopy of a USGS 7.5 minute topographic quadrangle is commonly used, or the Map Tool available on the Department website provides a satisfactory template for creating the required map (<http://maps.idwr.idaho.gov/TransferApplicationLayouts/Map>).
