The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its service date if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) The petition for reconsideration is disposed of; or
- (b) The petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

MEMORANDUM

Date: April 6, 2021
To: Transfer 84729 File
From: Benny Walker
Re: Evaluation of Sufficiency of Information Submitted

Application proposes transferring a 13.3 acre portion (0.24 cfs) of three ground water rights from a farm located approximately 7.25 to 8.0 miles south and 0.75 to 1.5 miles west of the center of Kimberly for stockwater and commercial use for expansion of an existing CAFO located approximately 4.5 to 5.0 miles south and 3.0 to 3.5 miles west of the US Hwy 93/30 interchange east of Filer. The transferred water will be diverted from a new well to be drilled and the existing well at the CAFO site.

The irrigation to commercial and stockwater use conversion was based on an acre to volume conversion factor of 3.02 af/acre taken from the University of Idaho crop consumptive volumes for alfalfa for 13.3 acres for the Twin Falls area. This was based on information received from the USDA that alfalfa was being grown on the farm. The wells involved with the transfer are located outside the ESPA smooth model boundary area so a ground water model analysis is not required. The three-groundwater rights, 47-17555, 47-17560, and 47-17565 involved with the transfer all include a condition indicating that they are combined with Twin Falls Canal Company water. However, the application includes a letter from the Twin Falls Canal Company indicating the limited number and specific locations of shares on the original place of use. Note that the three groundwater rights, involved with the transfer allow for the total irrigation of 163.1 acres and that the letter from the canal company indicates that there are only 100 shares of water on these 163.1 acres. Further more, the canal company letter also identifies the specific lands that these 100 shares are appurtenant to. Note that the 13.3 acre portion of the three groundwater rights proposed to be transferred does not overlap the specific lands that the 100 canal company shares are appurtenant to. It should also be noted that the Department has previously approved similar types of transfers in the past involving portions of these same three groundwater rights. The application was subject to notice and protest and no protest were received.

- **Authority to File:**

The application includes a copy of a contract for sale of water rights from the current listed owner of the rights being transferred, agreeing to sell and transfer the portion of the water rights being transferred to the applicant. This document was signed by the current owner of the rights and the owner of the new place of use. The application also includes a copy of a warranty deed showing that the applicant owns the proposed place of use.

- **Water Right Validity:**

Rights 47-17555, 47-17560 and 47-17565 were decreed in 2009. Current aerial photography indicates that these rights appear to have been used in recent years. Therefore forfeiture does not appear to be an issue.

- **Injury to Other Water Rights:**

None anticipated.

- **Enlargement of Use:**

None anticipated. Transfer will result in a reduction in the maximum allowed diversion volume.

- **Local Public Interest:**

No negative impacts anticipated. Application was subject to public notice and protest no protest were received

- **Beneficial Use/Conservation of Water Resources:**

Proposed uses are recognized as beneficial uses of water

- **Effect on Economy of the Local Area:**

None anticipated.

- **Effect of the Agricultural Base of the Local Area:**

None anticipated.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
