WATER SUPPLY BANK LEASE CONTRACT No. 1232

ADDITIONAL CONDITIONS OF ACCEPTANCE

1. The water rights referenced above will be rented from the bank at the current rental rate.
2. There is no rental payment to the lessor of the water right if the right or a part thereof is not rented from the bank.
3. While a right is in the bank, the lessor may not use the right without approval of the Department even if the right is not rented from the bank. Any violation of the terms of this lease may result in enforcement procedures pursuant to Idaho Code § 42-351 for illegal diversion and use of water and may include civil penalties pursuant to Idaho Code § 42-1701B.
4. A right accepted into the bank stays in the bank until the Board releases it, or the lease term expires. A right may be released from the bank upon request, provided the Board approves the release. Unless approved by the Department, leased rights may not be immediately available for release.
5. While a water right is in the bank, forfeiture provisions are stayed pursuant to Idaho Code § 42-223(5).
6. Rental of water under this right is subject to the limitations and conditions of approval of the water right.
7. Failure of the right holder to comply with the conditions of acceptance is cause for the Director to rescind acceptance of the lease.
8. Acceptance of a right into the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other Department application process.
9. In accordance with Idaho Code § 42-248 and § 42-1409(6), all owners of water rights are required to notify the Department of any changes in mailing address or change in ownership of all or part of a water right. Notice must be provided within 120 days of the change.
10. If a water right leased into the Water Supply Bank is sold or conveyed during the lease term, and if the leased right was rented, the rental proceeds will be disbursed in the following manner regardless of any arrangements between the buyer(s) and seller(s) to the contrary:
 - a. Rental payments will go to the lessor(s) of record at the beginning of the rental season, even if the Department processes a Notice of Change in Water Right Ownership during the rental season.
 - b. New lessor(s) of record will receive payment for any subsequent rental seasons.
11. The water right(s) is leased to the bank subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.
12. Use of water under these rights will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 63.
13. The right holder shall make full beneficial use of all surface water rights available to the right holder for irrigation of the lands authorized to be irrigated under this right. The right holder shall limit the diversion of ground water under this right for land with an appurtenant surface water right(s) to those times when the surface water supply is not available or the surface water supply is not reasonably sufficient to irrigate the place of use authorized under this right.
14. If the surface water right(s) appurtenant to the place of use is abandoned, forfeited, sold, transferred, leased or used on any other place of use, this right to divert ground water shall not be used on the

STATE OF IDAHO

WATER SUPPLY BANK LEASE CONTRACT No. 1232

land with an appurtenant surface water right(s) without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.

The period of use for the irrigation described in the approval of water right 63-34914, 63-34915, 63-34923 may be extended to a beginning date of 3/1 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 3/15 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than 4/10/2007.
16. The period of use for the irrigation described in the approval of water right 63-34917, 63-34918, 63-34920, 63-34921 may be extended to a beginning date of 3/1 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. Hi Jean - I hope you had some nice time out of the office.

By way of update, when I received your out-of-office response to my email below, I reached out to Justin Ferguson. After talking through my question below with him, our plan is to keep the Water Supply Bank lease applications as-is and submit companion rental applications to accommodate the ongoing irrigation needs at the site. We should have those rental applications on file soon; just trying to confirm a few last details.

As always, any questions or concerns, just let us know.

Thank you,
Dylan

Jean,

Thank you for your patience on this. Based on your question, we have been in contact with the lessee/operator at the site. It turns out that they have been and need to continue irrigating certain areas along the west/northwest side of the overall project area, including the specific area you asked about associated with 63-34914 - 63-34923. We are in the process of preparing a map that will more specifically identify those areas and the acreages involved.

As I recall, we can either amend the existing affected lease applications to exclude those areas altogether, or proceed with the existing lease applications and simultaneously rent those portions of the water rights back out from the Bank. Please let us know if you have thoughts or a preference as to which approach makes the most

sense. We will also seek to add a point of diversion to one of the rights; since we could do that temporarily with a rental application, perhaps that approach makes sense, but again, we wanted to see if you have a preference.

Also, this ongoing irrigation does not involve water right 63-9184A. The applicant still intends to lease that entire right to the Water Supply Bank, and you can proceed on that application while we finalize the plan for the remaining rights.

As always, just let me know of any other questions. If it would be more efficient to discuss real-time, feel free to give me a call.

Thank you,
Dylan

Jean,

My apologies for the delay in responding but we're trying to confirm what, if any, irrigation is currently being utilized by our tenant. We should have a response soon. I will confirm, however, that we do want to place all beneficial uses in the Bank.

I will revert once the irrigation question is confirmed. Thank you very much.

Subject: Water Supply Bank lease applications

The Idaho Department of Water Resources is in the process of reviewing the applications to lease several water rights to the Water Supply Bank. I have been in touch with the attorney who filed on your behalf but I do need to submit the questions to you also.

Regarding water right 63-34914, the beneficial uses for this water right is irrigation, irrigation from storage and irrigation storage. I'm assuming you want to place all beneficial uses in the Bank?

Has the land that is appurtenant to water rights 63-34914 to 63-34923 been irrigated at all this season?

Please respond within 14 days so I can continue processing these applications. Let me know if you have any questions. Thank you.

Re: Water Supply Bank Lease Applications (HA Winterfell LLC)

Dear Justin:

I am hereby submitting twelve Water Supply Bank lease applications for your review and processing. You may recall that you and I discussed these applications in general terms on June 2, 2020. Specifically, I am enclosing and submitting the following items with this letter:

- Twelve separate signed, original Water Supply Bank lease applications, executed by HA Winterfell LLC, pertaining to the water rights listed in the table included as Exhibit A to this letter;
- For the reason discussed below, ten place of use maps to accompany each lease application;
- A signed W-9 that is applicable to all twelve applications;
- A signed incumbency certificate applicable to all twelve applications; and
- A check in the amount of \$3,000.00 for the processing fees.

Please note, the lease applications for water rights 63-34914 and 63-34923 do not include place of use maps. After repeated attempts using three different web browsers, we kept receiving server errors and were simply unable to generate place of use map for these two water rights through IDWR's online mapping function. However, these rights share a permissible place of use with water rights 63-34915 through 63-34922.
