WATER SUPPLY BANK LEASE CONTRACT No. 1322

ADDITIONAL CONDITIONS OF ACCEPTANCE

1. The water rights referenced above will be rented from the bank at the current rental rate.
2. There is no rental payment to the lessor of the water right if the right or a part thereof is not rented from the bank.
3. While a right is in the bank, the lessor may not use the right without approval of the Department even if the right is not rented from the bank. Any violation of the terms of this lease may result in enforcement procedures pursuant to Idaho Code § 42-351 for illegal diversion and use of water and may include civil penalties pursuant to Idaho Code § 42-1701B.
4. A right accepted into the bank stays in the bank until the Board releases it, or the lease term expires. A right may be released from the bank upon request, provided the Board approves the release. Unless approved by the Department, leased rights may not be immediately available for release.
5. While a water right is in the bank, forfeiture provisions are stayed pursuant to Idaho Code § 42-223(5).
6. Rental of water under this right is subject to the limitations and conditions of approval of the water right.
7. Failure of the right holder to comply with the conditions of acceptance is cause for the Director to rescind acceptance of the lease.
8. Acceptance of a right into the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other Department application process.
9. In accordance with Idaho Code § 42-248 and § 42-1409(6), all owners of water rights are required to notify the Department of any changes in mailing address or change in ownership of all or part of a water right. Notice must be provided within 120 days of the change.
10. If a water right leased into the Water Supply Bank is sold or conveyed during the lease term, and if the leased right was rented, the rental proceeds will be disbursed in the following manner regardless of any arrangements between the buyer(s) and seller(s) to the contrary:
 - a. Rental payments will go to the lessor(s) of record at the beginning of the rental season, even if the Department processes a Notice of Change in Water Right Ownership during the rental season.
 - b. New lessor(s) of record will receive payment for any subsequent rental seasons.
11. The water right(s) is leased to the bank subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.
12. Water right 63-3108 does not grant any right-of-way or easement across the land of another.
13. The following rights are diverted through the ground water points of diversion described above: 63-3108, 63-12596, 63-32115. In addition, right 63-33535 is also diverted through the point of diversion described above as being in the SW¼SE¼ of Section 26, and right 63-12162 is also diverted through a point of diversion described above as being in the SW¼NE¼ of Section 26.
14. The total daily diversion under water right 63-12596 shall be limited to 3.6 af per day.

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

WATER SUPPLY BANK LEASE CONTRACT No. 1322

15. The unleased portion of water rights 63-3108, 63-32114 and 63-32115 when combined shall not exceed a total diversion rate of 1.93 cfs, a total annual maximum diversion volume of 433.8 af at the field headgate, and the irrigation of 96.4 acres.
16. The period of use for the irrigation for water right 63-3108 described in this approval may be extended to a beginning date of 3/1 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 3/15 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than 2/16/2007.
17. When combined with all other rights, the leased rights, 63-3108, 63-32114 & 63-32115 shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the place of use.
18. The unleased portion of water right 63-3108 is limited to the irrigation of 96.4 acres within the authorized place of use in a single irrigation season.
19. The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversions.
20. The unleased portions of water rights 63-3108, 63-12152, 63-12596, 63-32115, and 63-33535 when combined shall not exceed a total diversion rate of 4.56 cfs.

Water rights **63-3108, 63-12596, 63-32114 & 63-32115** were leased into the Water Supply Bank (Bank) as of January 1, 2021, in accordance with the enclosed executed lease contract. **Your water rights, as described on the lease contract, are considered leased into the Bank and should remain unused until they are formally released from the Bank.** More information and further restrictions placed on your water rights while leased can be found in conditions of acceptance of the lease contract. Read the conditions of acceptance carefully.

The rights will automatically be released from the Bank on **December 31, 2025**, unless the rights are released earlier by the Water Resource Board (Board). On behalf of the Board, the Department of Water Resources (Department) can evaluate an early release of the lease contract upon your request. To release the water rights from the Bank prior to the release date, submit a written request on the *Request to Release a Water Right from the Bank* form. This form is available on our public website at www.idwr.idaho.gov. **Please note your water rights may not be available for immediate release if they have been rented or are being considered for a future rental. Furthermore, it is at the discretion of the Department whether or not a water right can be released early from a lease contract.**

Please note, the combined limit totals, combined lease totals for the diversion rate and rentable diversion rate were updated to reflect the combined conditions on the water rights.

13 **Narrative:** The Department received these applications on December 29, 2020. The applications were signed by Benjamin Hay, registered agent. He wishes to place 18.4 acres of irrigation portion of these rights in the Bank. None of the storage uses are being placed in the Bank. These rights are limited together to 114.8 acres in a 150 acre PPU. 63-12596 was licensed in 2012 and the other rights were decreed in 2007. Portions of 63-3108, 63-32114 & 63-32115 have been in the Bank since 2011. A transfer, 77271, created the PPU in 2011 and the portion of 63-12596 was placed in the Bank in 2016. These rights overlap with municipal rights from the City of Boise and United Water (Suez). WR 63-32114 is a surface water right currently within WD 63. The other rights are ground water rights.

Lori,

I'm reviewing the Crane Creek Country Club lease applications. I need to know which 18.4 acres they are putting in the Bank. Attached is a break down you sent with the applications in 2016. T04N R02E Sec 35 NWNW is highlighted because they are not 4 acres of approved in this QQ, only 2. Let me know within 14 days so I can continue processing these applications. Thank you.
