6. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.

9. The agreement does not authorize the construction of a well
10. This right when combined with all other rights shall provide no more than 0.03 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the place of use.
11. Use of water under this water right may be regulated by the watermaster of State Water District No. 37.

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☒ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.** For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)
37-8031	irrigation	0.03 cfs	3.0 AF	1.0 AC		0.03 cfs	3.0 AF	1.0 AC
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL	0.03 cfs	3.0 AF	1.0 AC
						CFS	AF	AC

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☐ No ☒

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. If space below is insufficient, attach a separate page and label it **Attachment 4C**:

Re: Water Supply Bank Rental Application 1926

Purpose/Narrative: An application was received on behalf of the HP4 Trust from Mr. Jim Speck, signed by Ms. Kari Brotherton, on January 4, 2021 as part of a lease-rental package using water rights held by the Four Seasons HOA to irrigate property not otherwise covered by a domestic exemption. This rental, and the property it covers, was recently transferred from Ms. Helen Spaulding of the Spaulding Trust to Ms. Brotherton and the HP4 Trust.

Historically, the proposed place of use was covered under multiple rental agreements initially beginning in 2013 through the end of 2020. Based on the availability of water rights within the basin and that the property owners have pursued multiple rental agreements, it appears this rental will continue into perpetuity using the water rights from the HOA.

Authority to File: Per an assign and assumption agreement provided to the Department related to the prior rental, Ms. Brotherton and the HP4 Trust has purchased the property as well as taken ownership of the prior rental. This application was signed by Ms. Brotherton and prepared by her representative, Mr. Jim Speck. Current Blaine County records indicate the property has been conveyed to the Trust from Ms. Spaulding. No concerns at this time.

Water Right Validity/Forfeiture Evaluation: The water right being used for this rental is valid and leased to the Bank as part of a lease-rental package to facilitate this rental. No concerns at this time.

Injury Evaluation: No injury is apparent though the rental as the applicant intends to irrigate acreage that is otherwise not covered by a domestic exemption under *I.C. 42-111*. Further, as this proposal is in effect a continuation of irrigation practices established in 2013, no injury is foreseeable to local water users.

Enlargement of Use: No enlargement is evident through this rental as the acreage, without this rental, could not otherwise be irrigated. Additionally, until such time as the property is consolidated into the municipal system, the acreage will not receive irrigation from any other source than what is authorized under the domestic exemption. Because this is an irrigation rental, only the irrigation portion of the water rights requested are being used to facilitate this rental.

It is of note that the place of use is directly adjacent to another rental in the name of the Helen Spaulding Trust through the end of 2023. As the parcel was recently sold from Ms. Spaulding to the HP4 Trust, it can be inferred that the Bank will see a subsequent rental covering the same acreage in the name of the HP4 Trust. Further, these rentals, while adjacent, do not feature overlapping places of use. The rentals are meant to be complimentary such that the total acreage can be covered and, in the future, could be consolidated into a single rental. As with the other agreement, this rental has been calibrated to the local area standards such that it can be delivered via the same system without causing enlargement.

Local Public Interest: Staff are unaware of any local public interests that are averse to the rental.

Beneficial Use/Conservation of Water Resources: The rental appears consistent with the conservation of water resources in Idaho.

Department/Watermaster Comments: Watermaster for District 37 as well as IDWR Southern Regional comments requested on February 10, 2021. As of the date of this memo no concerns have been received.

Water Supply Bank Evaluation: Bank staff recommend the approval of this application for the HP4 Trust through the end of 2025.
