4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☐ No ☒

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.** For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request

						CFS	AF	AC

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☐ No ☐

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. Hi Remington,

the purpose of the extra water is for the entire canal, It is really for conveyance. We need the extra water so we can pull 75 cfs for GV Mutual Canal . The GV Mutual Canal is delivered from the Idaho Power Canal and then it splits and goes to the Grand View Irrigation and the Grand View Mutual Canal. The top half of the canal is delivered to the Private Right water users and then when it gets to the GV Mutual pump station it is the Grand View Mutual Canal. Upper Grand View has a pump station on the river and it pumps into the Grand View Mutual Canal. Shoo fly Water Rights are also delivered out of the same canal.

Subject: Water Supply Bank Rental Application 1978

Hi Dixie,

I'm processing Grand View Mutual Canal Company's (GVMCC's) 2021 Water Supply Bank rental application (ID number 1978) and I have a few questions for you I'm hoping you can answer for me.

1. The map provided with the rental application seems to suggest that the lands that will be the primary beneficiary of this rental application are lands owned by: Nederend Farms LLLP; Frances, Howard and/or Oscar Field; Charlotte Meyers/Meyers Farms Inc; and Katrina & Kenton Unruh (see map below). However, it also seems that the purpose of this rental is to increase flows in GVMCC's water delivery system (effectively a supplement to permit application 2-10504, which should benefit of all canal company shareholders, not just for the land owners at the end of the canal company system. Can you please clarify: will Nederend Farms LLLP, Frances, Howard and/or Oscar Field, Charlotte Meyers/Meyers Farms Inc, and Katrina & Kenton Unruh be the primary beneficiary of this rental, or will it be the entire canal company service area?

2. As an alternative way to phrase my question above: would it be most accurate to state that the place of use for water under this rental will be the canal itself, since it will be receiving increased flows for the benefit of canal company shareholders? Or, it is more accurate to characterize the place of use for this rental as the entire GVMCC service area? Or, is it more accurate to characterize the place of use for this rental as the lands owned by Nederend Farms LLLP, Frances, Howard and/or Oscar Field, Charlotte Meyers/Meyers Farms Inc, and Katrina & Kenton Unruh?
3. The lands listed on the map lie between two canals. To the north of these lands is what appears to be the Grand View Irrigation District Canal, and to the south appears to be the Shoefly Canal. Which canal delivers GVMCC water to these lands? Or, do both canals deliver GVMCC water to these lands?

Thanks for your response to these questions,
