RE: Water Permit No. 65-23597/Water Right No. 63-35021

Dear Mr. Fairchild:

The Department of Water Resources (Department) is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development established in compliance with the terms of the permit.

The permit was issued with water right number 65-23597. Based on the developed location of the well, the point of diversion exists in Basin 63 rather than Basin 65. As a result, your water right has been renumbered from 65-23597 to 63-35021. For any future items relating to the water uses authorized under this water right, number 63-35021 should be referenced.

Furthermore, the examiner who verified your water use reported that certain elements of the permit were developed differently than described on your permit. Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Idaho Code § 42-111. Before the license can be issued, your permit must be amended to depict your water use as it was actually developed.

Based on the examiner's report, the following elements were developed differently than described on your permit:

- Nature of Use: Domestic use of water was developed instead of the irrigation storage and irrigation from storage beneficial uses authorized by the permit.
- Place of Use: The irrigation use was developed outside the permitted Public Land Survey System (PLSS) description.

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when issued. Please review the amendment form carefully. If you concur with the information presented, please sign and return the form with a \$100.00 amendment filing fee within 14 days.

If you have any questions, please contact me at 208-287-4951 or angie.grimm@idwr.idaho.gov.

Sincerely,

Angela M. Grimm, P.G.
Water Rights Section Manager
