RE: Water Right Permit No. 63-32366

Dear Permit Holder:

The Idaho Department of Water Resources (Department) is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit.

On September 8, 2020, the Department received proof of beneficial use statement and a field report for water right 63-32366 from certified water right examiner Dave Shaw from ERO Resources Corp.

The field report submitted by Mr. Shaw showed 12 ponds instead of the 7 ponds authorized by the water right permit. Mr. Shaw also provided evidence that the 12 ponds were under the limits for volume and pond surface area that were originally permit. The Department have determined that we can move forward with licensing the 12 ponds.

Where the ponds for this permit intercept shallow ground water, each pond has its own separate and unique point of diversion located in the middle of each pond. We also discovered that some of the ponds were constructed in a 40 acre tract not described in the permit. Therefore, we require an amendment be completed on the permit prior to licensing this permit. We have prepared an amendment with the corrected points of diversion and the corrected place of use for your review.

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when issued. Please review the amendment form carefully. If you concur with the information presented, please sign and return the form with the \$100.00 filing fee within 14 days.

If you have any questions, please don't hesitate to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "Daniel A. Nelson", with a long horizontal flourish extending to the right.

Daniel A. Nelson
