It does not preclude the opportunity for review of the validity of this water right in any other Department application process.

Enclosures: Proposed Lease Contracts
Receipt: C109703

Memorandum

To: Water Right 2-10385
From: Justin Ferguson
Date: February 17, 2021
Re: Water Supply Bank Lease Application 1897

Purpose/Narrative: An application was received from Ms. Carpenter on December 21, 2020 offering the full portion of water right 2-10385 for lease to the Bank through the end of 2025. Prior to this application, the water right was leased to the Bank initially in 2011 through the end of 2015 and again in 2016 through 2020. Effectively this application is a continuation of the prior contracts to protect the water right from forfeiture. In the initial review it was noted that there had been an influx of lease proposals stemming from the parent water right 2-2191B as the ditch was no longer able to deliver irrigation to these properties. Additionally, based on a review of both satellite and aerial imagery, no irrigation has occurred since approximately 2009-2010 prior to its acceptance into the Bank.

Authority to File: The application was prepared and signed by Ms. Betty Carpenter. Current IDWR records indicate Mr. and Ms. Carpenter are the current water right holders while Canyon County parcel data indicates Mr. and Ms. Carpenter as the current land owners as well. No concerns at this time.

Water Right Validity/Forfeiture Evaluation: Historically, water right 2-10385 was decreed through the SRBA in 2009 and placed into the Bank in 2011. The water right has remained in the Bank under various contracts through the end of 2020 and has been offered again, in full, through the end of 2025. As a full period of non-use has not elapsed without a defense against forfeiture, the water right can remain valid and be leased to the Bank. No concerns at this time.

Injury Evaluation: There does not appear to be any concerns of injury should the water right be leased to the Bank. The acreage has not been irrigated since approximately 2009-2010 and, based on the initial review memo, is unable to receive irrigation from the designated point of diversion. Further, per the water right backfile the right does not appear to have been rented during any time it has been leased to the Bank. Should a rental be requested, a full review of the historic consumptive use may be warranted to prevent injury to local water users as the volume does not appear to have been put to use since the water right was decreed.

Enlargement of Use: The historic place of use for this water right does not fall within an irrigation district nor are there any other water rights appurtenant to the property that would provide for irrigation. Further, based on a review of both satellite and aerial imagery, it does not appear the property receives any other source of water other than precipitation. As such, given the information found in the initial review that the canal was no longer able to service the property along with the findings of this review, there does not appear to be a concern of enlargement leasing this water right into the Bank. Review of the historic use may be warranted to prevent enlargement to the aquifer should the water right be subject to a rental request.

Local Public Interest: Staff are unaware of any local public interests that are averse to the lease.

Beneficial Use/Conservation of Water Resources: The lease appears consistent with the conservation of water resources in Idaho.

Department/Watermaster Comments: Per updated guidance, comments are no longer required for IDWR Western Region. Additionally, the water right is not currently administered by a water district. As such, comments are not required at this time.

Water Supply Bank Evaluation: Based on the information presented by the applicant, staff recommend the proposal be approved for Mr. & Ms. Carpenter through the end of 2025.
