4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☒ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.** For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)
37-7792	irrigation	?	?	5		?	5	
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL		5	
						CFS	AF	
							AC	

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☐ No ☒

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. If space below is insufficient, attach a separate page and label it **Attachment 4C**:

MEMORANDUM FOR AGREEMENT # 506

To: Water Right(s) 37-7792
From: Scott Storms
Date: February 25, 2021
Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE: Application to rent water from the Water Supply Bank (Bank) was received from Daniel Tucker on December 16, 2020. The application originally proposed to rent enough water from water right (WR) 37-7792 to irrigate 5 acres of reclaimed mine tailings for a 5 year term. Mr. Tucker had previously rented the entire leased portion of 37-7792 for the same purpose under rental agreement 67, from 2016 to 2020. This agreement was for 2.5 acres, and after checking the current lease for 37-7792 (contract 1329) it was confirmed that there again was only 2.5 acres available for rent. On February 22, 2021 I called Mr. Tucker to ask if he indeed needed a full 5 acres and he stated that the 2.5 acres available from W 37-7792 would be enough.

AUTHORITY TO FILE: The application was submitted and signed by Daniel Tucker. Parcel data maintained by the Department of Water Resources (Department) shows Daniel Tucker as owner of the property at the place of use (POU) and point of diversion (POD). No concerns of authority to file.

WATER RIGHT VALIDITY: Water right 37-7792 was decreed in 2009 and the entirety of the right has been leased to the Bank since 2011. Although the entire 3 acres of the right has continually been leased to the Bank, all prior reviews found that there was up to a half acre of the leased land that remained irrigated by water from Wooden Hills Water Works (WR 37-7136). To account for this combined use, both the 2016 and 2021 leases accepted the full 3 acres into the Bank, but only 2.5 acres were made available for rent. There are no further concerns of water right validity.

INJURY TO OTHER WATER RIGHTS: The rental POD and POU are located in the same quarter-quarter as the lease POD and POU. This rental has occurred for the same purpose from the same POD since 2011. During that time the Department has received no complaints or concerns regarding this rental. There are no further concerns of injury to other rights.

ENLARGEMENT OF USE: There are no overlapping rights at the rental POU. This same rental has occurred since 2011 and has remained within the confines of the agreement. There are no further concerns of enlargement.

LOCAL PUBLIC INTEREST: Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES: The rental appears consistent with the conservation of water resources in Idaho

DEPARTMENT STAFF OR WATERMASTER COMMENTS: The location for the rental PD is located in the Southern office region and is subject to Water District # 37. Corey Skinner of the Southern office and Watermaster Kevin Lakey have been contacted for comment regarding this application.
