Subject: Comments, 75-15001 Cleeves

I have no objection or concerns with this approval. The Salmon River is not flow-limited in this reach. An approved NMFS criteria screen will be required by IDFG on the pump intake. Because this is a system serving 5 acres or less, measurement may be waived and W&S conditions 01H, 163, 197 and 198 are recommended. This area is not yet in a water district. WD Flag = NWD.

The Dnrjevic ditch travels through this parcel and historically supplied water to the Dnrjevic farm downstream (75-4196, 10509) and to the subdivision upstream. This parcel did not receive a decreed right although I suspect it was also historically irrigated from the ditch. The ditch is in poor repair and has blown out in a number of places including on the Cleeves property. No water has been delivered to Drnjevnik for about 3 years but property owners in the subdivision have resumed some use from the ditch. This application proposes a pump station directly from the river because deliveries through the ditch would be difficult.

The Cleeves property is under a purchase contract, and the buyers will coordinate with Cleeves to get the application or permit assigned after closing.

RE: Application for Permit No. 75-15001

New Appropriation Applicant's
Name:

Michael J. Cleaves
PO Box 542
Salmon, ID 83467-0542

Recommendation:

- a) I do not oppose approval of this application.
- b) X I do not oppose approval of this application if it is conditioned
as follows:
*Prior to diversion and use of water under this permit,
the right holder shall install a functioning NMFS criteria
fish screen approved by the Idaho Department of Fish and Game
on the point of diversion.*
- c) I oppose approval of this application for the following reasons:
- d) Additional comments:
