ADDITIONAL CONDITIONS OF ACCEPTANCE

1. The water rights referenced above will be rented from the bank at the current rental rate.
2. There is no rental payment to the lessor of the water right if the right or a part thereof is not rented from the bank.
3. While a right is in the bank, the lessor may not use the right without approval of the Department even if the right is not rented from the bank. Any violation of the terms of this lease may result in enforcement procedures pursuant to Idaho Code § 42-351 for illegal diversion and use of water and may include civil penalties pursuant to Idaho Code § 42-1701B.
4. A right accepted into the bank stays in the bank until the Board releases it, or the lease term expires. A right may be released from the bank upon request, provided the Board approves the release. Unless approved by the Department, leased rights may not be immediately available for release.
5. While a water right is in the bank, forfeiture provisions are stayed pursuant to Idaho Code § 42-223(5).
6. Rental of water under this right is subject to the limitations and conditions of approval of the water right.
7. Failure of the right holder to comply with the conditions of acceptance is cause for the Director to rescind acceptance of the lease.

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

WATER SUPPLY BANK LEASE CONTRACT No. 1332

8. Acceptance of a right into the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other Department application process.
9. In accordance with Idaho Code § 42-248 and § 42-1409(6), all owners of water rights are required to notify the Department of any changes in mailing address or change in ownership of all or part of a water right. Notice must be provided within 120 days of the change.
10. If a water right leased into the Water Supply Bank is sold or conveyed during the lease term, and if the leased right was rented, the rental proceeds will be disbursed in the following manner regardless of any arrangements between the buyer(s) and seller(s) to the contrary:
 - a. Rental payments will go to the lessor(s) of record at the beginning of the rental season, even if the Department processes a Notice of Change in Water Right Ownership during the rental season.
 - b. New lessor(s) of record will receive payment for any subsequent rental seasons.
11. The water right(s) is leased to the bank subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.
12. Rights 61-12232 and 61-12230 when combined shall not exceed a total irrigation diversion rate of 0.10 cfs, a total annual maximum diversion volume of 33.5 af at the field headgate, and the irrigation of 9.7 acres within the place of use described above in a single irrigation season.
13. The right holder shall make full beneficial use of all surface water rights available to the right holder for irrigation of the lands authorized to be irrigated under this right. The right holder shall limit the diversion of ground water under this right to those times when the surface water supply is not available or the surface water supply is not reasonably sufficient to irrigate the place of use authorized under this right.
14. If the surface water right(s) appurtenant to the place of use is abandoned, forfeited, sold, transferred, leased or used on any other place of use, this right to divert ground water shall not be used without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.
15. Water right 63-12232 is limited to the irrigation of 6.7 acres within the place of use described above in a single irrigation season. Water right 63-12230 is limited to the irrigation of 3.0 acres within the place of use described above in a single irrigation season.
16. Water right 63-12232 mitigates for the depletion of water resulting from the diversion and use of water under Right 61-12211. To prevent injury to other water right holders, the right holder shall cease diverting and using 0.01 cfs of this right, which shall remain undiverted. If the mitigation portion of this right is not deliverable due to a shortage of water or a priority call, then the amount of water authorized for diversion under the uses of Right 61-12211 that are being mitigated shall be reduced by the same proportion as the reduction to this right.
17. Right 61-12230 is an enlargement of Right 61-12232 pursuant to Section 42-1426, Idaho Code.
18. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the lands above.
19. The period of use for the irrigation described in this approval may be extended to a beginning date of 3/15 and an ending date of 11/15 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 4/1 and after 10/31 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the date of this approval.

13	Narrative: The Department received these applications on December 30, 2020. The application was signed by Ed DeGroot, member. He wishes to place the entirety of both rights in the Bank. The parent of this right was decreed in 2000 and the water has been in the Bank since 2005. There are no issues of forfeiture. WR 63-12230 is an enlargement right of 63-12232 both of which are supplemental to surface water, in this case, from the Mountain Home Irrigation District. The land will be irrigated with the MHID water. The rights were transferred to the current property by transfer 74977, approved in 2009, and have not been co-mingled with surface water. there should not be any concerns of enlargement if these rights are rented. The mitigation use on 61-12232 is also being offered. It was for permit 61-12211 that was never developed and lapsed in 2016. The applicant is waiting on direction from IDWR on how to reverse the mitigation use back to irrigation and wants to protect it until then. These rights are currently within WD 161.
