1. The Board is authorized under chapter 17, title 42, Idaho Code to operate a water supply bank and to contract with lessors to act as an intermediary in facilitating the rental of water.
2. The Lessor has filed a completed application to lease water rights described below into the Water Supply Bank on forms supplied by the Idaho Department of Water Resources and received by the Department on December 23, 2020.
3. The Director of the Idaho Department of Water Resources has reviewed the application for compliance with the Water Supply Bank rules and has approved the Lease subject to conditions listed below.

NOW, THEREFORE, in consideration of the mutual covenants and contracts herein contained, and other good and valuable consideration, the receipt of which is hereby acknowledged, the parties hereto agree as follows:

1. **WATER RIGHTS:** The Lessor shall lease and the Board shall accept into the Bank the Applicant's water rights described as follows:

5. **CHANGE OF WATER RIGHT:** This lease specifies water right elements including but not limited to: diversion rates; diversion volumes; number of acres authorized to be irrigated; places of use; points of diversion; beneficial uses; and seasons of use. During the term of this lease, if a water right is administratively changed due to a water right split and renumbering, this lease may be reduced by an equal amount to reflect the water right elements as legally defined under the water right. 3. While a right is in the bank, the lessor may not use the right without approval of the Department even if the right is not rented from the bank. WATER SUPPLY BANK LEASE CONTRACT No. 1319

9. In accordance with Idaho Code § 42-248 and § 42-1409(6), all owners of water rights are required to notify the Department of any changes in mailing address or change in ownership of all or part of a water right. Notice must be provided within 120 days of the change.
10. If a water right leased into the Water Supply Bank is sold or conveyed during the lease term, and if the leased right was rented, the rental proceeds will be disbursed in the following manner regardless of any arrangements between the buyer(s) and seller(s) to the contrary:
 - a. Rental payments will go to the lessor(s) of record at the beginning of the rental season, even if the Department processes a Notice of Change in Water Right Ownership during the rental season.
 - b. New lessor(s) of record will receive payment for any subsequent rental seasons.
11. The water right(s) is leased to the bank subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.
12. This right is for the use of ground water and is subject to administration as a water right from connected sources in the Snake River Basin in accordance with applicable law.
13. When ordered by the Director, the right holder shall provide mitigation acceptable to the Director to offset depletion of lower Snake River flows needed for migrating anadromous fish. The amount of water required for mitigation, which is to be released into the Snake River or a tributary for this purpose, will be determined by the Director based upon the reduction in flow caused by the use of water pursuant to this right. Any order of the Director issued in accordance with this paragraph shall be in conformance with applicable rules allowing the right holder due process as the need for mitigation and the amount of mitigation are determined.
14. This right for the use of ground water shall be junior to, and subject to, the water rights of the U. S. Bureau of Reclamation heretofore appropriated, including as authorized by applicable law, reuse of water under such rights.
15. Water bearing zone to be appropriated is from 100 to 250 feet.
16. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.

Memorandum

To: Water Right 63-31479
From: Justin Ferguson
Date: January 21, 2021
Re: Water Supply Bank Lease Application 1860

Purpose/Narrative: An application was received by the Department December 12, 2020 from Ms. Amber Streeper offering the entire portion of water right 63-3179 for lease to the Bank for a full five year term. Prior to Ms. Streeper taking ownership, the water right had been leased to the Bank by Mr. Ted Bohlman beginning in 2005 through the end of 2020.

Historically, it appears Mr. Bohlman had put the water right into the Bank in 2005 due to a dispute over the point of diversion. Per the initial lease application Mr. Bohlman stated that the owner would no longer allow him to divert from that well. As such, the water right was placed into the Bank and shares within the New York Canal were acquired to irrigate the acreage. It appears through the prior lease and this new proposal, Ms. Streeper intends to prevent comingling of the surface and ground water such that the water right can remain a primary right.

Authority to File: The lease application was prepared and signed by Ms. Amber Streeper with attachment 2A providing a signature from Mr. Joshua Streeper. Current IDWR records indicate Mr. and Ms. Streeper as the current water right holders while Ada County records indicate them as the current property holders as well. No concerns at this time.

Water Right Validity/Forfeiture Evaluation: Prior to this application the water right has been leased to the Bank beginning in 2005 through the end of 2020. During the time the water right was leased to the Bank it was licensed in 2012 into a fully perfected water right. As such, a period of non-use has not elapsed without a defense against forfeiture. No concerns at this time.

Injury Evaluation: No injury is apparent as the intent is to continue the forfeiture protection afforded by the Bank while preventing the comingling with surface water and preserving the water right as a primary right. Should the water right be rented, a review of the historic use may be warranted to prevent injury to both the aquifer and the local water users.

Enlargement of Use: No enlargement is apparent as it appears the water right has not been used since approximately 2004 and will continue to be idled. The acreage will receive water from the shares held within the New York Canal however, as the two have never been used together, 63-31479 can remain a primary ground water right separate from the shares. No concerns at this time.

Local Public Interest: Staff are unaware of any local public interests that are averse to the lease.

Beneficial Use/Conservation of Water Resources: The lease appears consistent with the conservation of water resources in Idaho.

Department/Watermaster Comments: No comments are required at this time. Per updated guidance, comments from IDWR Western Region are not necessary and, while the place of use falls within water district 63, they are not responsible for ground water at this time.

Water Supply Bank Evaluation: Based on the information presented by the applicant and pending any concerns or comments, staff recommend the lease proposal be approved for Ms. Streeper through the end of 2025.
