1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. Use of water under this agreement does not constitute a dedication of the water to renter's place of use, and upon expiration of this agreement, the points of diversion and place of use of the water shall revert to those authorized under the water right and/or again be available to rent from the bank.
4. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.

6. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.

8. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
9. This rental when combined with all other rights shall provide no more than 0.03 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the place of use.
10. This rental agreement does not authorize the construction of a well.

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☒ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.** For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)
29-2494	Irrigation	1.55	332	90		0.06	11	3
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL	0.06	11	3
						CFS	AF	AC

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

N/A

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☐ No ☒

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. MEMORANDUM FOR AGREEMENT # 491

To: Water Right(s) 29-2494

From: Scott Storms

Date: January 22, 2021

Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE: Application to rent water from the Water Supply Bank (Bank) was submitted by Kristin Moore of Rocky Mountain Environmental Associates Inc. on behalf of Robert Allen and was received by the Department of Water Resources (Department) on December 16, 2020. The application was in response to Notice of Violation (NOV) E2020-1647, in which the landowner was cited for the unauthorized irrigation of 1.7 acres. The rental application is for the 1.7 acres described in the NOV as well as another 1.3 acre pasture and tree grove area to the north for a total of 3 acres.

AUTHORITY TO FILE: The rental application was signed by Robert Allen. Parcel data maintained by the Department shows the land at the place of use (POU) as owned by Angela Allen. The certified mailing sent for the NOV was signed by Robert Allen. There are no concerns over authority to file.

WATER RIGHT VALIDITY: Water right 29-2494 was decreed in 2004. A review of the water right conducted in 2015 as part of a request for an extension of time to prevent forfeiture, found that the last time the irrigation portion of the right had been utilized was 2009. Because the right owners took action to protect the right in the 6th year after the right had last been utilized, the extension of time was granted from 2015 to 2020. In 2020 the right was leased to the Bank for a term of 5 years. No further concerns of water right validity.

INJURY TO OTHER WATER RIGHTS: The well point of diversion (POD) for the rental is located within the ESPA modeling boundaries and the lease POD is located in an adjacent modeling cell. According to Water Right Transfer Memo 24, PODs located in adjacent modeling cells do not require modeling to be processes. The rental POD is located only about one mile from the lease POD, however the two are on opposite sides of the Portneuf River. Review of historical NAIP imagery showed clear evidence of the primary 1.7 acre area having been irrigated as far back as 2011 and the norther 1.3 acre area having been irrigated since at least 2013. The NOV issues in 2020 was the result of Department staff imagery review and not due to public complaint. Since this area has been fully irrigated since 2013 without adjacent water right owner complaint, there appears to be no further concern of injury to other rights.

ENLARGEMENT OF USE: There are no overlapping rights at the rental POU and the rental amounts are directly proportional to those authorized by the water right being rented. There are no further concerns of enlargement.

LOCAL PUBLIC INTEREST: Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES: The rental appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS: Review memo and rental map have been emailed to Eastern Region contact James Cefalo and water district 29D Watermaster Harold Armstrong for review.
James Cefalo responded with no concerns.
