

MEMORANDUM

Date: January 25, 2021
To: Transfer 84645
From: Jake Nebeker
Re: Review & Evaluation of Sufficiency of Information

The purpose of this transfer is to rearrange the place of use for water rights 13-4120 and 13-8026. We will also take the opportunity to update the volume for water right 13-8026. Based on the authorized diversion rate and season of use, the maximum volume that can be diverted under 13-8026 is 263 acre-feet per year.

Authority to File:

The applicant is the current water right owner of record. Franklin county taxlot data shows the applicant as the owner for most of the proposed place of use. The proposed place of use overlaps 2.1-acres owned by Trevor Schvaneveldt. Based on department records a lease has been in place since 1962.

Water Right Validity:

Water right 13-8026 was licensed in 1966. Right 13-8026 and statutory claim 13-4120 were last evaluated in 2019 during transfer 82640. Forfeiture does not appear to be an issue.

Injury to Other Water Rights:

Other rights will not be injured by the proposed change. The place of use is simply being rearranged in close proximity to the current place of use. Neither the point of diversion nor the quantity authorized to be diverted will change as a result of the transfer.

Enlargement of Use:

The proposed change will not result in enlargement because neither rate nor volume nor irrigated acreage will increase as a result of the transfer.

Local Public interest:

No issues identified.

Beneficial Use/Conservation of Water Resources:

No issues identified.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
