Application for Transfer (Westerberg) Proposed Points of Diversion and Place of Use

0 400 800 1,600 Feet

Water diversion and distribution system

David Terry Westerberg

Water Right NO. 13-916

The proposed new diversion point for this water right is shown on attached map. The GPS coordinates are: 42.16701,-111.73557. The water will be diverted by an in channel concrete structure, with a variable lockable gate, to an adjoining weir. It will then be directed into an existing open channel and injected into the Consolidated Irrigation Company Canal at 42.16639,-111.73598. It will be re-diverted from the canal downstream at 42.216147,-111.74041 and distributed through a buried mainline and secondary system.

The diversion point and open channel to the canal is on State owned endowment property. I have inquired about an easement and they require this diversion point change before it can proceed.

This new diversion is upstream from my original point. The purpose of the proposed change is to allow me to combine my water right with my water stock in the canal. This would allow me to gravity sprinkle my field with Station Creek water rather than flood irrigate or pump. There is no change to the area the water is being used.
