Comments:

1. csaxton 9/2/2016 Quantity
The original license authorized 3.02 cfs on 280 acres. The duty calculates to 0.0108 cfs/acre. As far as I can tell, much of the 280 acres was never irrigated. This was an old license where the POU description listed 40 acres for each QQ. Using 2006 aerial photography, I calculated the irrigation place of use in 2006 to be 154.1 acres, with a duty of $(3.02/154.1) = 0.0199$ cfs per acre. When creating recommendations for 95-16533 and 95-16534, I split up the 154.1 acres according to property ownership, (except for the 15 acres on Waldos property that he did not

claim yet Bonucelli did) and applied the new duty of water (0.0199 cfs per acre) to the acreage. Volume was calculated using standard for the area of 3 AF per acre.

2. csaxton 9/2/2016 Competing Claim
Claim, 95-16533, under claims the irrigation place of use owned by the claimant (Waldo) by 15 acres. However, the 15 unclaimed irrigated acres is claimed under 95-16534 (Bonucelli). I will recommend Waldos 15 acres under 95-16534 to preserve the irrigation right. Waldo will need to file a change of ownership at some point to put that portion of the water right in his name.

3. csaxton 9/13/2016 UPDATE Competing Claim Comment
Comment Update (: IDWR received an amended claim for 95-16533 on September 12, 2016, that added the 15 acres that is owned by Waldo but was previously only claimed under 95-16534. I will recommend that 15 acres and the associated rate and volume under 95-16533 and reduce 95-16534 by that same amount.
