Riley,

We were just on the phone discussing amendments to the transfer application for water right 29-10323. It is advised that the place of use and the point of diversion reflect the original claim and past ownership records submitted. These records state the place of use resides within "The north 50 feet of lots 17, 18, 19, and 20, Block 1, Hall City, Bannock County, Idaho".

You had also mentioned over the phone that the point of diversion will be your well in your well house, on the north east corner of the property. The attached map will show the above place of use and point of diversion clearly. Also you clarified that this well is used exclusively for heating the sidewalks on the property, and there are no other uses associated.

I have found the amended application you provided is adequate. Both the Sorenson Meadows property and Lots 17-20 reside within the same QQ, therefore no changes to the application are needed. The map attached will need to be approved by you. Once I have your thumbs up I can get this application moving.

You had also inquired for more information on the water rights that are on the Sorensen Meadows LLC property. There are three water rights on that property including 29-4233, 29-4234, 29-150. You can find more information related to these water rights on our website IDWR.Idaho.Gov.
