Paul,

Sorry about the delay. I don't have a copy of the amendment dated February 12, 2013, but here are a couple of versions that were sent out. The difference between these is one lists a diversion rate of 0.18 cfs and the other lists a diversion rate of 0.20 cfs.

If memory serves, the original amendment listed 0.18 cfs. Then we sent out another one after listing 0.20 cfs based on further review of the file. Then with even further review of the file we switched back to 0.18 cfs.

I have a meeting scheduled with Shelley Keen (Water Rights Section Manager) where I will bring him up to speed as I mentioned on the phone. I will try to get some guidance of how he wants to move forward. I don't want to define an extension date at this time, but I can assure you that we (IDWR) won't take action on the permit until we speak again and have had a chance to review the information you planned on submitting.

Thanks.

Craig

Hi Craig- I am just following up on our telephone conversation. If you can, I would like to see the proposed amended permit that was offered to George, I believe it was enclosed with the letter dated February 12, 2013, but I do not see a copy of it in the online file. Thanks, Paul.
