5. General Information:

- a. Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required now or in the future:

- f. Describe the use of any other water right(s) for the same purpose or land, or the same diversion system as right(s) proposed to be transferred at both the existing and proposed point(s) of diversion and place(s) use:
Water rights 51-24A and 51-26A share points of diversion with 51-25A for irrigation. Applicant also has shares of water from the Bruneau Buckaroo Canal Company that are used to irrigated this property.

- g. To your knowledge, has/is any portion of the water right(s) proposed to be changed:

If yes, describe:

Transfer
Water Right 51-25A
Lance and Alice Gennette

This transfer is a companion transfer to one filed by Idaho Power for water rights 51-24A and 51-26A. Water Rights 51-24A, 51-25A and 51-26A were adjudicated with a common place of use totaling 25 acres. Idaho Power purchased 51-24A and 51-26A and is transferring those water rights to their property and moving 17.5 acres of irrigation associated with those rights. This transfer for water right 51-25A proposes to:

1. Reduce the irrigation right from 25 acres to 7.5 acres (as requested by IDWR)
2. Create a PPU for irrigation that aligns with current property boundaries
3. Clarify the POU for stockwater to show historic water use
4. Clarify the historic livestock watering areas (stockwater POD)

Water right 51-25A currently authorizes irrigation on 25 acres which is congruent with the place of use for rights 51-24A and 51-26A. An Idaho Power transfer of 51-24A and 51-26A, proposes to create a 55.7 acre permissible place of use with an allowable annual irrigation of 17.5 acres. This requires the annual irrigation allowed under 51-25A to be reduced to 7.5 acres. This will be accomplished by creating a permissible place of use of approximately 13.7 acres with an annual allowable irrigation of 7.5 acres. The allowable diversion rate for irrigation under 51-25A is 0.05 cfs. The PPU as described by this transfer will be primarily irrigated with shares from the Bruneau Buckaroo Ditch Company.

The POU for stockwater will be defined to reflect historic livestock uses on the property and the use will not exceed 13,000 gallons per day. The POD and POU for stockwater is being updated to reflect historic stockwater use along the Bruneau River.

IDWR offices are open to the public and following the CDC guidelines for wearing masks and observing social distancing. For in-person visits, we encourage you to call ahead for an appointment.

Subject: Water Rights 51-25A

Enclosed you will find a transfer for water right 51-25A. This is a companion transfer to an Idaho Power transfer for water rights 51-24A and 51-26A. This transfer is primarily being completed at the request of your department to separate the combined nature of the irrigation portion of the three water rights.

I am the owner and representative of my transfer and I defer all questions that may arise concerning my transfer and the combined nature of the three rights to Idaho Power.

Sincerely,

Lance Gennette
