

MEMORANDUM

To: Water Right Permit 83-11980

From: Luke Bates 

Date: 9/21/2020

Re: Permit for licensing to Appropriate Water within the State of Idaho.

An application for permit was received for domestic use in the name of Idaho Department of Parks and Recreation (IDPR). The application was advertised with the season of use of 1/1-12/31. Permit 83-11980 was approved on 3/25/2014, with the same season of use applied. An in-office exam was performed for this permit, with email correspondence between department staff and IDPR staff to obtain volume metrics for licensing purposes.

IDPR representative, Adam Zaragoza, provided the season of use data for Freeman Creek State Park in an email received on 9/17/2020; Mr. Zargoza stated that while the park was open year round, water resources were available from May 1st to September 31st annually. Using this information, the domestic component season of use was changed to reflect 5/1 to 9/31 during licensing review.

The permit approved domestic place of use (POU) for right 83-11980 omitted the government lot designator for the SESW ¼¼ PLS location of the park. During licensing review, government lot 9 was added to describe the portion of the POU located within 37N01E, Sec 1, SESW9.
