Subject: FW: Application for Transfer 83414 (Crapo Ag et al.)

Rob,

I am just following up on this email. Have you had any success tracking down someone at Department of Lands who can provide consent for the proposed changes? Is there anything I can do to assist you in finding the right person? The transfer approval has been prepared and can be signed once we confirm that Department of Lands is okay with the transfer.

Subject: Application for Transfer 83414 (Crapo Ag et al.)

Rob,

Application 83414 was filed in June 2019 and proposes to change a shared point of diversion for the Crapo family businesses. The Department determined that the application did not need to be advertised because the proposed point of diversion was a replacement well located 700 feet north of the original point of diversion. There are no other ground water wells in the immediate area. We are prepared to approve Transfer 83414, but are waiting on a document from you. Water rights 22-13946, 22-13948, 22-13950, 22-13952, and 22-13954 list the State of Idaho and Norvue Farms as co-owners of the water rights. Before we can proceed with approval, we need confirmation that the State of Idaho (Department of Lands) does not oppose the proposed change. On July 25, 2019, Amanda Fowler sent you an email confirming that a letter from Department of Lands would be sufficient evidence of consent. I would also accept an email from Department of Lands as evidence of consent. Another option would be to send the Department of Lands direct notice of the application and provide a time period for protest. When you get a moment, can you provide a brief update on this application.
