Re: Response to Unauthorized Point of Diversion-E2019-1382 Letter; Application for Transfer of Water Right for Water Right Nos. 22-13945 through 22-13954 and 22-14227 through 22-14251.

Dear Amanda:

Enclosed for processing is an *Application for Transfer of Water Right* for the above-enumerated water rights. This transfer is in response to a letter dated March 15, 2019, from you concerning a well located in the NWNE Section 25 T06N, R41E. As described in the maps enclosed with this transfer, this new well was a replacement well to an already authorized point of diversion under the above-enumerated water rights. The former well has been abandoned pursuant to the applicable Idaho statutes and regulations by representatives of Vollmer Well Drilling. Vollmer Well Drilling also drilled the new well, which was completed on December 31, 2014.

The water rights being amended all belong to entities associated with the Crapo family. As part of estate planning, the Norvue Farms General Partnership properties were surveyed and split out to different entities owned by different Crapo family members. It is for this reason that there are so many water rights under this transfer application. Additionally, we note that for five of the water rights (Water Right Nos. 22-13946 through 22-13954) one of the co-owners is the State of Idaho. We have included a copy of the *Standard Form 5 Stipulated Elements of a Water Right* for one of the water rights at issue (as a representative of the SF5's showing that there is a condition associated with these rights that states "The ownership of this water right is governed by a private agreement executed by the Idaho Department of Lands and Norvue Farms General Partnership dated March 23, 2010."). While I was not the attorney that was involved in preparation of that agreement, my understanding is that it is similar to other agreements that I was involved in which essentially provides that this water right covers State of Idaho lands, but that if the co-owner of the water right ceases leasing the property from the State of Idaho, there is a time period designated in the agreement for the former lessor to move the water rights on the State lands off the State property. To my recollection, there is not a provision that gives the lessor the unilateral right to

amend the water rights without notifying the State of Idaho of such changes. For that reason, I am copying with this letter and all of its attachments to Andrea Courtney, the Deputy Attorney General for the Department that signed the SF5 in 2010, and who is still with the Department. I will follow up with her to see what form of consent we believe is appropriate to allow this transfer to be processed.

We also note that the change in location to the point of diversion is very close to the old location and is within the same $\frac{1}{4}$ $\frac{1}{4}$ section. While it is true that the prior description described it down to a 10-acre parcel, for purposes of this transfer, we have elected simply to remove the 10-acre tract designation and request that the location for the new well be described as the NW $\frac{1}{4}$ NE $\frac{1}{4}$ Section 25, 06N, 41E. It is our position that if this is done, there is no need to advertise this transfer application and it can be processed quickly. However, if you disagree, please let me know and describe the basis of the Department's position.

Finally, based on review of the water rights, they collectively authorize a combined diversion rate of 27.85 cfs, and based on the Department's fee schedule, the fee associated with amending all of these water rights is \$2,340.00. We have included a check in that amount with the enclosed application.

If you have any questions regarding this transfer application, please do not hesitate to call me. We appreciate your attention to this matter.

Best regards,

Robert L. Harris
