PROOF ACKNOWLEDGEMENT LETTER

RE: Permit Nos. 87-10573 and 87-10575

Dear Permit Holder:

The Department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permits.

A condition of permit 87-10573 may not have been complied with according to the information you have provided on your proof form.

Condition no. 4 of this permit states:

"A fish screen of ¼ inch or smaller mesh shall be installed and maintained at the point of diversion.

You must comply with conditions of the permit without delay and prior to the field examination. I have enclosed a copy of this permit for your information. If you feel the condition is unnecessary you may submit a written request to the Department asking the requirement be waived.

The next step in the process of developing a water right is for the Department to conduct a field examination to determine and confirm the use being made of the water.

Please be advised that Idaho Code § 42-248, requires you or the owner of this water right to maintain current ownership and address records on file with the Department. Forms to file a change of ownership of a water right and/or a change in the address of the water right owner are available from any Department office or at the Department's website at www.idwr.idaho.gov.

If you have any questions concerning the field examination, please contact the Northern Region Office of the Department located in Coeur d'Alene at (208) 762-2800.

Sincerely,

Debbi Judd
Technical Records Specialist

MEMORANDUM

TO: Water Right Permit File 87-10573 and 87-10575

FROM: Daniel A. Nelson

DATE: December 18, 2019

SUBJECT: In-house field examination

At the time proof of beneficial use was filed, we tried to perform an in-house exam, but were unable to clearly see a spring or any water troughs with the imagery that was available. Therefore, it is recommended that a field exam or drive by exam be made to GPS the spring and water troughs. The house is visible in the aerial imagery, so that shouldn't be an issue. The spring could actually be an arm of the creek or in stream bed, so it would pay to confirm its location.
