3. While a right is in the bank, the lessor may not use the right without approval of the Department even if the right is not rented from the bank. 4. GENERAL INFORMATION

- A. Is the diversion works or system owned or managed by an irrigation district or water delivery company? Yes ☐ No ☒
If yes, provide written consent from the company, corporation or irrigation district authorizing the proposed sale or lease (Attachment 4A).
If your water right is delivered through a canal, lateral or ditch operated by a canal company, irrigation district, or similar delivery entity, your lease request must include written consent from the company, district, or similar entity for your removal of water from its system pursuant to Section 42-108, Idaho Code and IDAPA WSB Rule 37.02.03.25.02e.
- B. Please provide a description of the current water diversion and delivery system.
Water right 22-13916 is a ground water right that does not require authorization from any water delivery company.
- C. Describe any other water rights used for the same purpose at the same place of use as the water right being offered to the Bank. The Ironwood subdivision holds ownership of the same water rights. Water right 22-13916 was split off from the original water right when the acreage was converted from farm ground to a subdivision
- D. Are any of the water rights identified in Section 4C stacked with the water right proposed for lease? Yes ☐ No ☒
Stacked water rights are used together to achieve a common beneficial use, such as irrigation of the same lands. Stacked water rights cannot be separated and must be jointly leased to the Water Supply Bank. Stacked water rights qualify for the multiple fee payment of \$500.
- E. Will the present place of use continue to receive water from any other source? Yes ☒ No ☐
If yes, explain the relationship between the different water sources and how enlargement of the authorized use will not occur if this water right is leased. The Garden/Darby water company provides irrigation water to the property. The property is no longer farmed as it is a subdivision
- F. Identify annual volumes and/or rates of water diverted in the last 5 years to accomplish the beneficial use authorized by this water right. Annual volumes or rates are unknown. In recent years, irrigation was applied to this property via well water pump system & a pivot. The corners of the property was irrigated by hand lines from the Garden/Darby pipe line.
- G. Has any portion of this water right undergone a period of five or more consecutive years of non-use? Yes ☒ No ☐
If yes, describe the circumstances and attach evidence to demonstrate how the water right has not been lost through forfeiture (Attachment 4G). See Section 42-223, Idaho Code for exceptions to forfeiture. Your application may be denied if forfeiture concerns are not addressed. Water right 22-13916 was used to irrigate approx. 33 acres of TOWN R45E S12 to show beneficial use during the growing season of 2020. Substantial costs were incurred to do this. No crop was planted as the location is an active subdivision.
- H. Is this water right involved in any other IDWR process, such as an application for transfer or a mitigation plan?
If yes, describe. Yes ☐ No ☒

RE: **WATER SUPPLY BANK LEASE CONTRACTS 1245
FOR WATER RIGHTS 22-13916**

Dear Lessor:

Water right **22-13916** will be leased into the Water Supply Bank (Bank) as of January 1, 2021, in accordance with the enclosed executed lease contract. **Your water rights, as described on the lease contract, are considered leased into the Bank and should remain unused until they are formally released from the Bank.** More information and further restrictions placed on your water rights while leased can be found in conditions of acceptance of the lease contract. Read the conditions of acceptance carefully.

The Department added condition #13 to page 5 of the contract. Your water right may only be rented and used on lands that have shares of Garden Water Company to avoid enlargement of the right.

The rights will automatically be released from the Bank on **December 31, 2024**, unless the rights are released earlier by the Water Resource Board (Board). On behalf of the Board, the Department of Water Resources (Department) can evaluate an early release of the lease contract upon your request. To release the water rights from the Bank prior to the release date, submit a written request on the *Request to Release a Water Right from the Bank* form. This form is available on our public website at www.idwr.idaho.gov. **Please note your water rights may not be available for immediate release if they have been rented or are being considered for a future rental. Furthermore, it is at the discretion of the Department whether or not a water right can be released early from a lease contract.**

If you have questions regarding this matter, please contact this office at bank@idwr.idaho.gov or 208-287-4800.

Sincerely,

Jean Hersley

Subject: RE: WSB Lease Application 22-13916

Jean,

If water right 22-13916 is accepted into the WSB, the right must be conditioned to only be available for use on land covered by shares in Garden Creek Water Company. Water right 22-13916 and the shares in Garden Creek Water Company represent a combined beneficial use of water (the irrigation of 32.8 acres), regardless of whether the two sources have been comingled in the past. If we allow the ground water to be used on acres without Garden Water Company shares, then the water rights will be enlarged. This question of enlargement is the primary issue in the Duffin case, currently before Judge Wildman. If the WSB is not interested in including a condition on the lease, requiring any renter to have shares in Garden Water Company, then perhaps you should hold off on processing this lease application until Judge Wildman issues a decision in the Duffin case.

Narrative: The Department received this application on October 13, 2020. This is for the 2021- 2025 seasons. The application was signed by the current owner, Darrin Teeter. Mr Teeter would like to place the entire right in the Bank. This right was decreed in 2009. This water right was originally for irrigation for farm land before it was subdivided. Aerial imagery suggests some irrigation took place in 2018. There is a SD card in the file that shows attempts to irrigate the land in 2020. There is no crop planted, just sage brush. According to ArcMap, Water right 22-13808 has the same POD. The POU overlaps with water rights owned by the Ironwood Subdivision and Garden Water Co. LTD, but I don't believe it has been co-mingled. These entities supply the water for the lots in the subdivision. Mr. Teeter was quitclaimed the water right in 2011, no land was conveyed. This water right is currently NOT within a WD.
