7. Failure of the right holder to comply with the conditions of acceptance is cause for the Director to rescind acceptance of the lease.

14. If the surface water right(s) appurtenant to the place of use is abandoned, forfeited, sold, transferred, leased or used on any other place of use, this right to divert ground water shall not be used without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.
15. This right originated as all or part of right no. 30 in the Stewart Decree and the historic Boise River Water Masters records.
16. Memorandum

To: Water Rights 63-161BN & 63-2932

From: Justin Ferguson

Re: Water Supply Bank Lease Application 1542

Purpose/Narrative: An application to lease portions of water rights 63-161BN and 63-2932 was received by the department December 2019. The portions offered for lease through 2024 have been previously leased to the Bank, beginning in 2009 through December 31, 2019.

The acreage is part of the Surprise Valley subdivision and the 25 acres being offered are not directly designated but are noted to be within the 255 acre place of use. A study provided by SPF Water Engineers indicates that of the acreage covered by homes, the average coverage is only 25% leaving 75% of each parcel irrigable. This value they were able to determine that 116 acres were needed and 25 could be offered for protection to the Bank.

Review of the study information and the most current data available the average coverage is closer to 27 acres. Including a generalized value for driveway coverage the total acreage covered with hardscape was approximately 53 acres. Because the two rights, after an approved 2010 transfer (no. 75967), are within a 255 acre PPU the total acreage can be calculated below:

	SqFt	Acres	Coverage	Coverage Percent
Total Acreage	1041678.0	23.9	109.1	10906.4
Average	2643.9	0.1	0.3	27.7

Driveway Hardscape 12' square For Single and 24' square for Double				
	SqFt		Acres	
W/Single	1098558.0	=	25.22	Acres TTL
W/Double	1269198.0	=	29.14	Acres TTL
			27.18	Average at 50% Single and Double
Roads		=	26.00	Acres
		Total	53.2	
		Decreed w/transfer	255.0	
		Remaining	201.8	
Amount irrigated as indicated in application			116.0	
		Remaining	85.8	

The remaining acreage has enough space such that they are able to still fully use the right regardless of the hardscaped area. This does not however take into account the total actual acreage irrigated. This information was provided by the applicant through the measured diversion rate and volume at the Micron headgate. Further data may be necessary to review the actual acres irrigated to prevent injury or enlargement.

After a phone call with their representative, the HOA would like to split the contract into two separate contracts. The first contract will be for 20 of the 25 initial acres proposed with the same duration while the second will be for the remaining five acres and only leased for a single year.

Authority to File: The applications were signed by Mr. Thomas Wicher and submitted on behalf of the Surprise Valley Homeowners Association by Lori Graves of SPF Water Engineering. Review of the Surprise Valley website indicates that Mr. Wicher is the President of the HOA. No concerns of validity at this time.

Water Right Validity/Forfeiture Evaluation: Initially water right 63-161BN was right no. 30 in the Stewart Decree and Boise River Water Masters records was decreed in 2007. 63-2932 was later developed as a supplemental ground water right for use when diversions under 63-161BN were inadequate or should there be a mechanical failure. Review of the previous leases indicate that only 25 acres have been protected from forfeiture through the Bank and 116 had been irrigated. Using satellite imagery it appears as if the acreage under the hardscape may be lost due to non-use. Further review is necessary to make a determination however, as there are not generally accepted beneficial uses for applying irrigation to hardscape and, there have only been 25 acres protected through the Bank, the actual size of the PPU may be closer to approximately 202 acres instead of the 255 decreed.

Injury Evaluation: No injury is apparent through the lease alone, conditions will be added to the approval such that the combined limits are preserved on the unleased portions of the two rights.

Enlargement of Use: Through this review it does not appear there is a concern of enlargement. Further review of the actual acres irrigated may be necessary such that the 116 acres indicated as irrigable through the study provided can be verified. Should there be more than 116 acres the applicant will have to adjust the amount offered for lease so that the total 141 acres is preserved.

Local Public Interest: Staff are unaware of any local public interests that are averse to the lease.

Beneficial Use/Conservation of Water Resources: The lease appears consistent with the conservation of water resources in Idaho.

Department/Watermaster Comments: Watermaster and IDWR Western Region comments were requested September 18, 2020, no concerns were received.

Water Supply Bank Evaluation: Based on the information presented by the applicant, staff recommend the application be approved.
