FROM: Allen Merritt

DATE: March 27, 1995

TO: File: Application for Permit 72-07531

SUBJECT: Review and Recommendation

This application proposes to divert a small amount of water for irrigation of a small tract of land and the use is such that it can be considered "domestic" pursuant to 42-111. The application mentions the use will be around a cabin site and the map shows that the cabin will also be served by a well.

The source is Morgan Creek which has a decree on it and at times prior decreed rights require the full flow in the creek. Morgan Creek is organized under WD 72F however the district is not active and no watermaster has been appointed for years.

Recommendation:

I recommend that the application be approved with the following conditions:

1. Subject to prior water rights and subject to control by elected watermaster for Morgan Creek.
2. A measuring device and means of control be provided at point of diversion for regulation by watermaster.
3. When this right and the domestic right which may be established by using the well at the cabin site are combined the total use shall not exceed 13,000 gallons per day nor irrigation of more than 1/2 acre of land.
4. Permit is subject other county, state & federal approvals that may be required.
