COMPLETE
WATER RESOURCES
WESTERN REGION

An application for transfer must be prepared in accordance with the minimum requirements listed below to be accepted by the Department. Incomplete applications will be returned. The instructions, fee schedule, Part 2A reports and additional Part 2B forms are available from any Department office or on the Department's website at www.idwr.idaho.gov.

Name of Applicant(s) New Union Ditch Co. LTDCheck whether each item below is *attached* (Yes) or *not applicable* (N/A) for the proposed transfer.Yes N/A * Means the item is always required and must be included with the application.

- ☒ * Completed Application for Transfer of Water Right form, Part 1.
- ☒ * Signature of applicant(s) or applicant's authorized representative on Application for Transfer Part 1. Include evidence of authority labeled Attachment #3 (see below) if signed by representative.
- ☒ * Application for Transfer Part 2A. Attach a Part 2A report describing each water right in the transfer as currently recorded.
- ☒ ☐ Complete and attach an Application for Transfer Part 2B for each water right for which only a portion is proposed to be changed through this transfer application.
- ☒ * Application for Transfer Part 3A is always required (see Attachment #7a below); Parts 3B and 3C must be completed for transfer applications proposing to change the nature of use of the water right(s) or proposing changes to supplemental right(s).
- ☒ * Correct fee submitted with transfer application form. (Fee schedule is on website and instructions for application for transfer.)

Attachments to Application - Label each attachment with the corresponding number shown below as Attachment #1-10.

- ☐ ☒ #1 If the applicant is a business, partnership, organization, or association, and not currently registered in the State of Idaho as a business entity, attach documentation identifying officers authorized to sign or act on behalf of right holder. (See Part 1.)
- ☐ ☒ #2a Water Right ownership documentation if Dept. records do not show the applicant as the current water right owner. **
- ☐ ☒ #2b If the ownership of the water right will change as a result of the proposed transfer to a new place of use, attach documentation showing land and water right ownership at the new place of use. Include documentation for all affected land and owner(s). **
** Additional fee(s) required for water right ownership changes; see fee schedule.
- ☐ ☒ #3 Documentation of authority to make the change if the applicant is not the water right owner.
- ☐ ☒ #4 Power of Attorney or documentation providing authority to sign or act on the applicant's behalf. (See Part 1.)
- ☐ ☒ #5 If the transfer application proposes to change the point of diversion for a water right affecting the Eastern Snake Plain Aquifer (ESPA), attach the results of an ESPA analysis and a detailed mitigation plan to offset any depletions to hydraulically connected reaches of the Snake River. ESPA transfer spreadsheet and model grid labeled cells are available on the Department's website at www.idwr.idaho.gov/WaterManagement/WaterRights/WaterRightTransfers/resources.htm.
- ☐ ☒ #6 Notarized statement of agreement or a statement on official letterhead signed by an authorized representative from each lien holder or other entity with financial interest in the water right(s) or land affected by the proposed transfer. (See Part 1.5.c.)
- ☒ * #7a Attach a map identifying the proposed point(s) of diversion, place(s) of use, and water diversion and distribution system details as described on the application. Include legal description labels. If only a portion of the right is proposed to be changed, identify the current location of the part of the existing right(s) proposed to be changed. (See Part 3A.)
- ☒ ☐ #7b If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (GIS) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use. If some or all of any right is leased to the Water Supply Bank, you must also show the the specific location and/or acres to be idled at the new, proposed place of use to satisfy lease requirements.
- ☒ ☐ #8a If the transfer application proposes to change the nature of use or period of use for one or more rights, provide documentation describing the extent of historic beneficial use for the water rights proposed to be transferred and document how enlargement will be avoided. (See Part 3B.) Additional fee required for proposed changes to nature of use; see fee schedule.
- ☐ ☒ #8b If the transfer application proposes to change the place of use of a supplemental irrigation right, provide documentation regarding the historic use of the supplemental right(s) and availability or reliability of the primary right(s) being supplemented, both before and after the proposed change. (See Part 3C.)
- ☐ ☒ #9 Water Supply Bank information for all rights proposed for transfer and currently leased to the Bank. (Attachment WSB)
- ☒ ☐ #10 Other. Please describe: Attachment 10a: descriptions for transfer items 5a and 5c and project narrative; Attachment 10b: property surface water share certificate

A. PURPOSE OF TRANSFER

- ☐ Change point of diversion
☒ Change nature of use

☐ Add diversion point(s)
☐ Change period of use

☐ Change place of use
☐ Other _____
- Describe your proposal in narrative form, including a detailed description of non-irrigation uses to justify amounts transferred (i.e. number of stock, etc.), and provide additional explanation of any other items on the application. Attach additional pages if necessary and label it **Part 1A.2**.
Applicant proposes changing the nature of use of a portion of the identified water right to provide mitigation for evaporative losses from a pond proposed in a residential subdivision development.

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

APPLICATION FOR TRANSFER OF WATER RIGHT

PART 1 Continued

B. DESCRIPTION OF RIGHTS AFTER THE REQUESTED CHANGES. IF THE RIGHTS ARE BEING SPLIT, DESCRIBE PORTIONS TO BE CHANGED AS THEY WOULD APPEAR AFTER THE REQUESTED CHANGES.

1.	Right Number	Amount (cfs/ac-ft)	Nature of Use	Period of Use	Source & Tributary
All or Part ☐ ☒	63-146	12.24 cfs	Irrigation	3/1 to 11/15	Boise River
☐ ☐		173.6 ac-ft	Aesthetic Storage	1/1 to 12/31	
☐ ☐		0.98 cfs	Diversion to Storage	3/1 to 11/15	
☐ ☐		0.54 cfs	Mitigation by Non-Use	3/1 to 11/15	
☐ ☐				to	
☐ ☐				to	
☐ ☐				to	
☐ ☐				to	
☐ ☐				to	

Total authorized under rights 13.76 cfs and/or 173.6 acre-feet.

2. Total amount of water proposed to be transferred or changed 0.22 cubic feet per second and/or 33.4 acre-feet per year.

3. Point(s) of Diversion: (proposed new aesthetic storage volume)

- ☒ No changes to point(s) of diversion are proposed - the following chart is therefore not completed. (Proceed to #4.)
- ☐ Attach Eastern Snake Plain Aquifer analysis if this transfer proposes to change a point of diversion affecting the ESPA. Label it **Attachment #5**.

New ?	Lot	¼	¼	¼	Sec	Twp	Rge	County	Source	Local name or tag #

4. Place of use: (If irrigation, identify with number of acres irrigated per ¼ ¼ tract.)

- ☐ No changes to place of use are proposed - the following chart is therefore not completed. (Proceed to #5.)

Twp	Rge	Sec	NE ¼				NW ¼				SW ¼				SE ¼				Acre Totals
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
4N	1E	15							AS			AS							
												L4							
Total Acres (for irrigation use)																			

AS = Aesthetic Storage pou to be added to the right

No change in company pou boundary proposed

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

**APPLICATION FOR TRANSFER OF WATER RIGHT
PART 1 Continued**

5. General Information:

- a. Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required now or in the future:

See Attachment 10a

- b. Who owns the property at the point(s) of diversion? n/a - no change in the point of diversion

If other than the applicant, describe the arrangement enabling the applicant to access the property for the diversion system:

- c. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts?

If yes, ☐ attach a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes on official letterhead signed by an authorized representative. Label it **Attachment #6**. List the name of the entity and type of lien: n/a

It is the applicant's responsibility to provide notice to lien holder, trustee, mortgagor, or contract holder of the proposed changes that may impact or change the value of the water rights or affected real property. Any misrepresentation of legal encumbrance on this application may result in rejection of the application or cancellation of an approval.

- d. Are any of the water rights proposed for transfer currently leased to the Water Supply Bank?

If yes, ☒ complete Attachment WSB.

- e. Describe the effect on the land now irrigated if the place or purpose of use is changed pursuant to this transfer:

See Attachment 10a

- f. Describe the use of any other water right(s) for the same purpose or land, or the same diversion system as right(s) proposed to be transferred at both the existing and proposed point(s) of diversion and place(s) use:

Associated application for permit for aesthetic storage from ground water for the subject pond.

- g. To your knowledge, has/is any portion of the water right(s) proposed to be changed:

Yes No

- | | | |
|-------------------------------------|-------------------------------------|---|
| ☐ | ☒ | undergone a period of five or more consecutive years of non-use, |
| ☒ | ☐ | currently leased to the Water Supply Bank, |
| ☐ | ☒ | currently used in a mitigation plan limiting the use of water under the right, or |
| ☐ | ☒ | currently enrolled in a Federal set-aside program limiting the use of water under the rights? |

If yes, describe:

Shares associated with the ponds' pou are currently leased to the Water Supply Bank until 12/31/2023.

Applicant will request associated water be released from the Bank upon transfer approval.

Place of Use: MITIGATION BY NON-USE same as IRRIGATION

Place of Use: DIVERSION TO STORAGE same as IRRIGATION

Conditions of Approval:

1. Transfer 73632 authorizes the diversion of water in the amount of 0.36 cfs and 66.4 af to be used for replacement of losses caused by evaporation from 10 ponds associated with Right 63-31934.
2. 172 The boundary encompassing the place of use for irrigation under this water right is described with a digital boundary as authorized by Idaho law. The data comprising the digital boundary are stored in the electronic document management system of the Department and are incorporated into this approval by this reference. A map depicting the place of use for irrigation is attached to this approval document to illustrate the place of use described by the digital boundary.
3. Transfer 73632 authorizes the diversion of water in the amount of 0.09 cfs and 20.2 af to be used for replacement of losses caused by evaporation from one pond and evapotranspiration from the irrigation of 4 acres associated with Right 63-32143.
4. R05 Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 63.

5. K06 This right is limited to the irrigation of 622.8 acres of the 686.5 acres decreed for this right within the place of use described above in a single irrigation season. 19.0 acres has been dedicated to mitigate right no. 63-34105. 8.0 acres has been dedicated to mitigate right no. 63-34154. 36.7 acres has been converted to diversion to storage and aesthetic storage uses as described in other conditions.
6. Transfer 75286 authorizes the diversion of water in the amount of 0.16 cfs and 28.0 af to be used for replacement of losses caused by evaporation from three (3) ponds associated with Right 63-33631.
7. This approval (Transfer 78771) authorizes the diversion of water in the amount of 0.12 cfs and 21.0 af to be used for replacement of losses caused by evaporation from one (1) pond associated with Right 63-33792 and three (3) ponds associated with Right 63-33772.
8. T07 The right holder shall accomplish the change authorized by this Transfer within one (1) year of the date of the approval.
9. 155 This right shall receive 100 percent of its decreed quantity until the natural flow of the waters of the Boise River shall decrease so that all rights containing this condition cannot receive 100 percent of their decreed quantities, at which time this right and the other rights containing this condition shall first be cut to 75 percent of their decreed quantities, as the natural flow of the river decreases, beginning with the latest rights containing this condition and preceding to the earliest rights containing this condition in the order of their priority dates, and after all of the rights containing this condition shall have been reduced to 75 percent of their decreed quantities, should the natural flow of the waters of the river decrease below the amount necessary to supply 75 percent of those decreed quantities, then this right and the other rights containing this condition, beginning with the latest and preceding to the earliest, shall be reduced to 60 percent of their decreed quantities.
10. T08 Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfers.
11. T19 Pursuant to Section 42-1412(6), Idaho Code, this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as may be determined by the Snake River Basin Adjudication court at a point in time no later than the entry of the final unified decree.
12. SD1 This right originated as all or part of right no. 14 in the Stewart Decree and the historic Boise River Water Masters records.
13. Transfer 70266 authorizes the diversion rate in the amount of 0.03 cfs and 4.6 af to be used for replacement of losses caused by evaporation from one pond associated with Right 63-12598.
14. S45 Diversion for irrigation under this water right prior to April 1 and after October 31 shall occur only as authorized by the Water District 63 Water Master and only when water is being released for flood control by the United States from the Lucky Peak Dam outlet under procedures and requirements for the Memorandum of Agreement between the U.S. Department of the Army and the U.S. Department of the Interior for Flood Control Operations of the Boise River Reservoirs, dated November 20, 1953, the Water Control Manual for Boise River Reservoir dated April 1985 and any future amendments or revisions made thereto pursuant to state or federal procedures or law; provided that any such use of this water right prior to April 1 and after October 31 shall be subordinated to water rights for storage in Lucky Peak Reservoir, Lake Lowell, Arrowrock Reservoir, and/or Anderson Ranch Reservoir, as decreed in SRBA Case No. 39576.
15. R43 The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion.
16. X36 Rights 63-125K, 63-126G, 63-161L, 63-205, 63-206, 63-258B, 63-263, 63-286, 63-288B, 63-28977, 63-31778, 63-31806, and 63-31937 are also diverted through the point of diversion described above.

Absolute Scale: 1:22,477

0 1,500 3,000 Feet

Transfer Attachment 8a

Enlargement is not a concern based on the following application summary:

Water right coverage for 10.8 acres of ponds is being proposed for Renovare HOA, Inc. The source of the water is shallow ground water assumed to be in hydraulic connection with the adjacent Boise River. Mitigation to Boise River flows is required to offset consumptive use resulting from water evaporation from the surface of the ponds and will be accomplished by changing the nature of use from irrigation to aesthetic storage for 10.8 shares/acres of New Union Ditch Co. (NUDC) water right 63-146. Water-bearing zone to be appropriated is from 0 to 20 feet.

Consumptive Use Data & Proposed Mitigation. The consumptive requirement and subsequent depletion rate to river flows required for shallow ponds and grass pasture, which is the typical crop grown within the NUDC service area, can be calculated based on the ET Idaho (<http://data.kimberly.uidaho.edu/ETIdaho/>) precipitation deficit tables for the Boise Airport climate station. The amount proposed for mitigation is based on a one to one ratio; 1 acre of irrigation for 1 acre of pond surface area. The calculations demonstrate that 10.8 acres of pond surface area will annually evaporate 24.5 acre-feet, equivalent to the consumptive use associated with 7.9 acres of grass pasture. As shown on the attached Water Balance data sheet, during the 60% Stewart Decree cut, 7.9 acres of grass pasture can sufficiently satisfy the ponds' anticipated peak daily consumptive use requirement of 4.68 mm/day. As a result, 10.8 acres of NUDC water converted from irrigation to aesthetic use will more than adequately offset the consumptive use resulting from the ponds.

Included are the Department's pond loss calculation spreadsheets for pond seepage, evaporation and storage capacity that further support the adequacy of the amount proposed for change to aesthetic storage.

Seepage Loss Calculations

This spreadsheet has been designed by Idaho Department of Water Resources to estimate the total annual seepage losses from a pond.

FILE NUMBER	63-
REVIEWER	SPF
DATE	7/22/2020

User Input
Calculated value
Formula Explanations

INPUTS

Pond Surface Area (AC.)	10.8	AC.
-------------------------	------	-----

Pond Surface Area (SQ. FT.)	470448	SQ. FT.
-----------------------------	--------	---------

I used the following method to obtain my Soil Classification information:	NRCS Web Soil Survey	
My Soil Classification is	GrndWtr	
Suggested Seepage Rate (FT./DAY)	0.0000	FT./DAY

Formula: (Surface Area X Seepage Rate) X 7.48 = Gallons Per Day Loss
--

Convert to GPD	0	GPD
----------------	---	-----

Total Seepage Loss (AFA)	0.0	AFA
--------------------------	-----	-----

Though sand and gravel seepage rates may actually be higher, the maximum allowable rate is 0.2 ft/day, pursuant to Administrative Memo "Seepage Loss Standards for Ponds and Reservoirs."

Suggested Seepage Rates for Different Soil Types:
GW, GP, GM, GC, SW, SP and SM (silty sand, sand silt mixtures and gravel mixtures) = 0.2 ft per day
OL and ML (inorganic silts - very fine sands, silty, or clayey fine sands) = 0.02 ft per day
SC (clayey sands, sand clay mixtures) = 0.007 ft per day
CL (Low to medium plasticity clays) = 0.003 ft per day
MH, OH, PT and CH (high plasticity clays) = 0.0003 ft per day
LINED PONDS (liners can be chemical, fabric, or bentonite) = 0 ft per day
Ponds Intercepting Groundwater (excavated ponds filled by ground water) = 0 ft per day

PLEASE NOTE: The initial basis for the Suggested Seepage Rates in the table above is found on Page 16 of Seepage from Fish Ponds, Bulletin 599, August 1989 Alabama Agricultural experiment Station, Auburn University, Auburn University Alabama. If you don't know the soil type, please refer to the map provided at the NRCS Web Soil Survey (Tab #1), an ArcMap Soil Classification Map (Tab #1.1), or published NRCS Soil Survey (Tab #1.2). Use "0" if the pond fill relies on the water table.

Evaporation Loss Calculations

Calculated value
Formula Explanations

The acronyms used on the Kimberly Research Center website are defined below:

P = Precipitation
ET= Evapotranspiration
P _d = Precipitation deficit
P _d =ET-P

USING THIS SPREADSHEET

Use the link below to access the Kimberly Research Center website. This website provides the Precipitation Deficit for a station most representative of the pond under examination. The Precipitation Deficit is the total amount of free water surface evaporation minus the precipitation for a given area, which gives the total amount of evaporative losses incurred by the pond. There are several weather sites that are used throughout the state. IDWR staff can find the nearest site using Arc Map. The shape file containing the sites can be found at X:/Spatial/Climate/ETIdahostations.shp.

Instructions:

1. Use the link below to navigate to ET Idaho 2012.
2. Select the station which is most representative to your pond location.
3. Click Submit Query.
4. Under "Land Covers with Evapotranspiration Estimates," select "Open Water - Shallow Systems (ponds, streams)" or "Open Water - small stock ponds" depending on the pond size.
5. Click the link to "Precipitation Deficit."
6. Reference and copy (ctrl + C) the first subheading "Mean" values.
7. Click the "Paste Values from ET Idaho" button. The table will automatically enter a zero (0) for any negative precipitation deficit values.

Found at: <http://data.kimberly.uidaho.edu/ETIdaho/>

Precipitation Deficit

Station: Boise WSFO Airport

Month	mm/day ¹	Days per month	mm/Month
Jan	-0.62	31	0.00
Feb	0.11	28	3.08
March	0.83	31	25.73
April	2.07	30	62.10
May	2.76	31	85.56
June	4.12	30	123.60
July	4.68	31	145.08
August	3.95	31	122.45
September	2.65	30	79.50
October	1.41	31	43.71
November	-0.21	30	0.00
December	-0.78	31	0.00

PLEASE NOTE: The seasonal average for precipitation deficit should not be used for calculations because precipitation often exceeds evaporation during wetter months of the year. If the pond is kept full, excess precipitation during wetter months does not serve to refill the pond during drier months.

For example, see Sandpoint KSPT (NWS -- 108137), the annual precipitation deficit is -106 mm. However, April through September have positive precipitation deficit values. To properly estimate the annual volume of water necessary to refill a pond due to evaporation losses, the table will automatically enter a zero (0) for each month that the precipitation value is reported as a negative value.

As described above, precipitation offsets evaporation in winter months, so the net effect is that wintertime precipitation deficit is usually zero.

Total mm/year = 690.81

$$[(690.81 \text{ mm/yr}) \div (304.8 \text{ convert to feet})] \times (10.80 \text{ Surface area of pond, in acres}) = 24.5 \text{ AFA Evaporation Loss in Acre Feet}$$

Total Storage Calculations

FILE NUMBER	63-
REVIEWER	SPF
DATE	7/22/2020

This spreadsheet has been designed by Idaho Department of Water Resources to estimate the total seepage, evaporation and fill capacity required for a pond.

User Input
Calculated value
Formula Explanations

Surface Area (AC.)	10.8	"Surface Area" is automatically carried over from the "Seepage Loss" sheet.
Average Pond Depth (FT.)	15.0	"Average Pond Depth" depicts the actual depth of the pond either measured or estimated. Note: If you know the maximum depth and not the average depth, the Field Examiner's Handbook suggests multiplying the maximum depth by 0.4 to get the average depth, or you can use any method that seems reasonable to attain average depth.
Pond Capacity (AF)	162	Pond Capacity is calculated by multiplying the Pond Surface Area by the Average Pond Depth. If you know the capacity, divide the capacity by surface area and enter the average pond depth in the space above. Note: If pond capacity is determined using a method shown on the "Pond Capacity" sheet, the user may need to modify the value of "Pond Capacity" (cell B9) manually. Note that if the value is modified manually, the formula will be altered for future use.
Multiple Fill Volume Above Initial Fill to Fulfill From Storage Needs- "Multiple Fills" (AF)	0	The "Multiple Fill Volume Above Initial Fill" is the acre-feet of water required to meet a <i>from storage</i> component if the <i>from storage</i> component exceeds a one time fill. This section should not include the amount of water needed to fill the pond initially or the amount of water needed to maintain the pond level due to evaporation or seepage. For example: if a pond has a capacity of 5 acre feet and 2.5 acre feet of seepage and evaporation, but the pond is used for irrigation that requires 10 acre feet of from storage for the irrigation use, then you would insert 5 acre feet into this location (10 acre feet needed - 5 acre feet from the initial fill = 5 acre feet of additional storage needed). Note: You must have a " <u>From Storage</u> " component exceeding the initial fill on the permit to include a volume in this space.
Estimated Seepage Loss (AF)	0.0	The "Estimated Seepage Loss" is automatically carried over from the "Seepage Loss" sheet.
Estimated Evaporation Loss (AF)	24.5	The "Estimated Evaporation Loss" is automatically carried over from the "Evaporation Loss" sheet.
Total Volume Required (AF)	186.5	The "Total Volume Required" is calculated by adding the Pond Capacity, Multiple Fills, Seepage Loss, and Evaporation Loss amounts to determine the total amount of storage required.

Transfer Attachment 10a

Transfer Item 5.a. – *Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required in the future:*

Existing diversion dam in the Boise River with canal and ditches to the place of use. The 0.22 cfs aesthetic portion provides mitigation for a permit application for 4 interconnected ponds in the name of Renovare HOA, Inc. The aesthetic flow will be delivered to pond 2 via the existing New Union Ditch Co. (NUDC) diversion, canal and ditch system for mitigating lake surface evaporation.

Transfer Item 5.e. – *Describe the effect on the land now irrigated if the place or purpose of use is changed pursuant to this transfer:*

The place of use for the ponds will no longer be irrigated but the shareholder will continue to own shares for the aesthetic use. The irrigated place of use for water right 63-146 will be reduced by 10.8 acres at T4N, R1E Section 15, SWNW and L4, NWSW. The NUDC's place of use boundary remains unchanged.

Enlargement is not a concern based on the following application summary.

Water right coverage for 10.8 acres of ponds is being proposed for Renovare HOA, Inc. The source of the water is shallow ground water assumed to be in direct hydraulic connection with the adjacent Boise River. Mitigation to Boise River flows is required to offset consumptive use resulting from the ponds and will be accomplished by changing the nature of use from irrigation to aesthetic storage for 10.8 shares/acres of NUDC water right 63-146. Water-bearing zone to be appropriated is from 0 to 20 feet.

**RE: Transfer No. 84376
Water Right No(s). 63-146**

Dear Applicant(s):

The Department of Water Resources has received your water right transfer application. Please refer to the transfer number referenced above in all future correspondence regarding this transfer.

A legal notice of the application has been prepared and is scheduled for publication in the IDAHO STATESMAN, TIMES NEWS, LEWISTON TRIBUNE, POST REGISTER on 11/5/2020 and 11/12/2020. Protests to this application may be submitted for a period ending ten (10) days after the second publication.

If the application is protested, you will be sent a copy of each protest. All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, the Department will process your application and notify you of any action taken on the application. If your application is approved, the Department will send you a copy of the approval document.

Please contact this office if you have any questions regarding the application.

Sincerely,

Anna Kaiser
Water Resource Agent

Dear Watermaster:

The Idaho Department of Water Resources (IDWR) is seeking written comment and/or recommendations from you regarding the above referenced water right applications. Copies of the application are enclosed with this email for your reference. Please review the applications, complete a recommendation form, and submit your reply, if any, to this office by **November 23, 2020**.

IDWR will assume you do not object to these applications if a timely response is not received. Please contact me if you have any questions in this matter. Thank you for your help.

Sincerely,

Anna Kaiser | Water Resource Agent

NOTICE OF PROPOSED CHANGE OF WATER RIGHT

TRANSFER NO. 84376

NEW UNION DITCH CO LTD, PO BOX 31, EAGLE, ID 83616 has filed Application No. 84376 for changes to the following water rights within ADA County(s): Right No(s). 63-146; to see a full description of these rights and the proposed transfer, please see <https://research.idwr.idaho.gov/apps/waterrights/querynewtransfers>. The purpose of the transfer is to change a portion of the above rights as follows: New Union Ditch Co. LTD is an irrigation water provider for its district in northern Ada County. The company filed transfer 84376 to change the nature of use of a portion of water right 63-146's irrigation use to aesthetic storage to provide mitigation for evaporative losses from four ponds in the Renovare Subdivision. The source of the water for the ponds is shallow ground water assumed to be in hydraulic connection with the adjacent Boise River.

Permits will be subject to all prior water rights. For additional information concerning the property location, contact the Western office at (208)334-2190; or for a full description of the right(s), please see <https://idwr.idaho.gov/apps/ExtSearch/WRAApplicationResults/>. Protests may be submitted based on the criteria of Idaho Code § 42-203A. Any protest against the approval of any application must be filed with the Director, Dept. of Water Resources, Western Region, 2735 W AIRPORT WAY, BOISE ID 83705-5082 together with a protest fee of \$25.00 for each application on or before 11/23/2020. The protestant must also send a copy of the protest to the applicant.

Sent: Wednesday, September 16, 2020 3:43 PM
To: Smith, Tyler; Bank
Subject: RE: Transfer 84376 water right leased to water supply bank

WATER RESOURCES
WESTERN REGION

Hi Tyler,

Please proceed with processing the transfer application.

Based on the calculations from SPF/McHugh Bromley, 10.8 acres of irrigation will be subtracted from water right 63-146 through Transfer 84376. No impact will arise to our administration of Water Supply Bank lease contract 864 (for water right 63-146) provided, once transfer 84376 is approved, NUDC does not divert more than 8.33 cfs from the Boise River, for the irrigation of more than 340.3 acres.

However, as was mentioned in the transfer application, they should submit a new WSB lease application to IDWR if they intend to exceed a diversion rate of 8.33 cfs, or an irrigation maximum of 340.3 acres, once the transfer is approved. Please make sure SPF and McHugh Bromley is made aware of these limitations.

Thanks,

Remington

Subject: Transfer 84376 water right leased to water supply bank

Hi there,

Please see that attached transfer application #84376 for New Union Ditch Company LTD. The transfer was filed in order to change the nature of use for a portion of the right to cover mitigation for ponds. Water right 63-146 is included in the transfer and is currently leased to the water supply bank until 12/31/2023. The applicant stated, "Applicant will request associated water be released from the Bank upon transfer approval. Please let me know if this transfer application can be processed, or if action needs to be taken in order to maintain compliance with the WSB.

Thanks for your help,
