WATER RESOURCES
WESTERN REGION

STATE OF IDAHO

Ident. No. 63-34954

DEPARTMENT OF WATER RESOURCES

APPLICATION FOR PERMIT

To appropriate the public waters of the State of Idaho

1. Name of applicant(s) Renovare Homeowners' Association, Inc. Phone 208-323-1080
 Name connector (check one): and or and/or
 Mailing address 6149 N. Meeker Place, Ste. 150 City Boise
 State ID _____ ZIP 83616 Email _____
2. Name of representative, if any SPF Water Engineering Phone 208-383-4140
 Mailing address 300 E. Mallard Dr., Ste. 350 City Boise
 State ID _____ ZIP 83713 Email lgraves@spfwater.com
- a. Send all correspondence for this application to the representative and not to the applicant OR
 Send original correspondence to the applicant and copies to the representative.
- b. The representative may submit information for the applicant but is not authorized to sign for the applicant OR
 The representative is authorized to sign for the applicant. Attach a Power of Attorney or other documentation.
3. Source of water supply Ground Water which is a tributary of Boise River
4. Location of point(s) of diversion:

Twp	Rge	Sec	Govt Lot	¼	¼	¼	County	Source	Local name or tag #
4N	1E	15			SW	NW	Ada	Ground Water	Pond 1 Centroid
			4		NW	SW	Ada	Ground Water	Pond 2 Centroid
			4		NW	SW	Ada	Ground Water	Pond 5 Centroid
					NW	SW	Ada	Ground Water	Pond 3 Centroid

5. Water will be used for the following purposes:
 Amount 186.5 ac-ft for Aesthetic Storage purposes from 1/1 to 12/31 (both dates inclusive)
 (cfs or acre-feet per year)
- Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)
- Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)
- Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)
6. Total quantity to be appropriated is (a) _____ cubic feet per second (cfs) and/or (b) 186.5 acre-feet per year (af).
7. Proposed diverting works:
 a. Describe type and size of devices used to divert water from the source. Four ponds with average depths of 12 to 15 feet and 10.8 acres of total surface area
- b. Height of storage dam n/a feet; active reservoir capacity 162 acre-feet; total reservoir capacity 162 acre-feet. If the reservoir will be filled more than once each year, describe the refill plan in item 12. For dams 10 feet or more in height AND having a storage capacity of 50 acre-feet or more, submit a separate [Application for Construction or Enlargement of a New or Existing Dam](#). Application required? Yes No
- c. Proposed well diameter is _____ inches; proposed depth of well is _____ feet.
- d. Is ground water with a temperature of greater than 85°F being sought? Yes No
- e. If well is already drilled, when? _____; drilling firm _____; well was drilled for (well owner) _____; Drilling Permit No. _____

For Department Use

Received by LE Date 08/31/2020 Time 10:40 AM Preliminary check by TS
 Fee \$ 290.00 Received by LE Receipt No. W048672 Date 08/31/2020

8. Description of proposed uses (if irrigation only, go to item 9):
- a. Hydropower; show total feet of head and proposed capacity in kW. _____
 - b. Stockwatering; list number and kind of livestock. _____
 - c. Municipal; must complete and attach the Municipal Water Right Application Checklist.
 - d. Domestic; show number of households _____
 - e. Other; describe fully. Aesthetic use for ponds resulting from gravel mining

9. Description of place of use:
- a. If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
 - b. If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols. AS = Aesthetic Storage

TWP	RGE	SEC	NE				NW				SW				SE				TOTALS	
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE		
4N	1E	15							AS					AS						
														L4						

Total number of acres to be irrigated: _____

10. Describe any other water rights used for the same purposes as described above. Include water delivered by a municipality, canal company, or irrigation district. If this application is for domestic purposes, do you intend to use this water, water from another source, or both, to irrigate your lawn, garden, and/or landscaping? New Union Ditch Co. surface water

11. a. Who owns the property at the point of diversion? Applicant
 b. Who owns the land to be irrigated or place of use? Applicant
 c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing: _____

12. Describe your proposal in narrative form, and provide additional explanation for any of the items above. Attach additional pages if necessary. Water bearing zone to be appropriated is from 0 to 20 feet. As proposed on the accompanying transfer application, surface water shares from New Union Ditch Co. will be used to mitigate the the evaporative losses resulting from the pond based on a 1:1 ratio. Additional information provided in the attached narrative.

13. Time required for completion of works and application of water to proposed beneficial use is 5 years (minimum 1 year).

14. **MAP OF PROPOSED PROJECT REQUIRED** - Attach an 8½" x 11" map or maps clearly identifying the proposed point of diversion, place of use, section #, township & range. The map scale shall not be less than two (2) inches equal to one (1) mile.

The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

APPLICATION NARRATIVE & PROPOSED MITIGATION

Four existing, interconnected ponds encompassing 10.8 acres of total surface area are proposed for Renovare HOA, Inc. The source of the water is shallow ground water assumed to be in hydraulic connection with the adjacent Boise River. Mitigation to Boise River flows is required to offset consumptive use resulting from water evaporation from the surface of the ponds and will be accomplished by changing the nature of use from irrigation to aesthetic storage for 10.8 shares/acres of New Union Ditch Co. (NUDC) water right 63-146. Water-bearing zone to be appropriated is from 0 to 20 feet.

Consumptive Use Data & Proposed Mitigation. The consumptive requirement and subsequent depletion rate to river flows required for shallow ponds and grass pasture, which is the typical crop grown within the NUDC service area, can be calculated based on the ET Idaho (<http://data.kimberly.uidaho.edu/ETIdaho/>) precipitation deficit tables for the Boise Airport climate station. The amount proposed for mitigation is based on a one to one ratio; 1 acre of irrigation for 1 acre of pond surface area. The calculations demonstrate that 10.8 acres of pond surface area will annually evaporate 24.5 acre-feet, equivalent to the consumptive use associated with 7.9 acres of grass pasture. As shown on the attached Water Balance data sheet, during the 60% Stewart Decree cut, 7.9 acres of grass pasture can sufficiently satisfy the ponds' anticipated peak daily consumptive use requirement of 4.68 mm/day. As a result, 10.8 acres of NUDC water converted from irrigation to aesthetic use will more than adequately offset the consumptive use resulting from the ponds; enlargement is not a concern.

Also included are the Department's pond loss calculation spreadsheets for pond seepage, evaporation and storage capacity that support the proposed total annual pond volume.

Seepage Loss Calculations

This spreadsheet has been designed by Idaho Department of Water Resources to estimate the total annual seepage losses from a pond.

FILE NUMBER	63-
REVIEWER	SPF
DATE	7/22/2020

User Input
Calculated value
Formula Explanations

INPUTS

Pond Surface Area (AC.)	10.8	AC.
-------------------------	------	-----

Pond Surface Area (SQ. FT.)	470448	SQ. FT.
-----------------------------	--------	---------

I used the following method to obtain my Soil Classification information:	NRCS Web Soil Survey	
My Soil Classification is	GrndWtr	
Suggested Seepage Rate (FT./DAY)	0.0000	FT./DAY

Formula: (Surface Area X Seepage Rate) X 7.48 = Gallons Per Day Loss

Convert to GPD	0	GPD
----------------	---	-----

Total Seepage Loss (AFA)	0.0	AFA
--------------------------	-----	-----

Though sand and gravel seepage rates may actually be higher, the maximum allowable rate is 0.2 ft/day, pursuant to Administrative Memo "Seepage Loss Standards for Ponds and Reservoirs."

Suggested Seepage Rates for Different Soil Types:

GW, GP, GM, GC, SW, SP and SM (silty sand, sand silt mixtures and gravel mixtures) = **0.2 ft per day**

OL and ML (inorganic silts - very fine sands, silty, or clayey fine sands) = **0.02 ft per day**

SC (clayey sands, sand clay mixtures) = **0.007 ft per day**

CL (Low to medium plasticity clays) = **0.003 ft per day**

MH, OH, PT and CH (high plasticity clays) = **0.0003 ft per day**

LINED PONDS (liners can be chemical, fabric, or bentonite) = **0 ft per day**

Ponds Intercepting Groundwater (excavated ponds filled by ground water) = **0 ft per day**

PLEASE NOTE: The initial basis for the Suggested Seepage Rates in the table above is found on Page 16 of Seepage from Fish Ponds, Bulletin 599, August 1989 Alabama Agricultural experiment Station, Auburn University, Auburn University Alabama. If you don't know the soil type, please refer to the map provided at the NRCS Web Soil Survey (Tab #1), an ArcMap Soil Classification Map (Tab #1.1), or published NRCS Soil Survey (Tab #1.2). Use "0" if the pond fill relies on the water table.

Evaporation Loss Calculations

This spreadsheet has been designed by Idaho Department of Water Resources to estimate the annual evaporation losses from a pond.

FILE NUMBER	63-
REVIEWER	SPF
DATE	7/22/2020

User Input
Calculated value
Formula Explanations

USING THIS SPREADSHEET

Use the link below to access the Kimberly Research Center website. This website provides the Precipitation Deficit for a station most representative of the pond under examination. The Precipitation Deficit is the total amount of free water surface evaporation minus the precipitation for a given area, which gives the total amount of evaporative losses incurred by the pond. There are several weather sites that are used throughout the state. IDWR staff can find the nearest site using Arc Map. The shape file containing the sites can be found at X:/Spatial/Climate/ETIdahostations.shp.

The acronyms used on the Kimberly Research Center website are defined below:

P = Precipitation
ET= Evapotranspiration
P _d = Precipitation deficit
P _d =ET-P

Instructions:

1. Use the link below to navigate to ET Idaho 2012.
2. Select the station which is most representative to your pond location.
3. Click Submit Query.
4. Under "Land Covers with Evapotranspiration Estimates," select "Open Water - Shallow Systems (ponds, streams)" or "Open Water - small stock ponds" depending on the pond size.
5. Click the link to "Precipitation Deficit."
6. Reference and copy (ctrl + C) the first subheading "Mean" values.
7. Click the "Paste Values from ET Idaho" button. The table will automatically enter a zero (0) for any negative precipitation deficit values.

Found at: <http://data.kimberly.uidaho.edu/ETIdaho/>

Precipitation Deficit

Station: Boise WSFO Airport

Month	mm/day ¹	Days per month	mm/Month
Jan	-0.62	31	0.00
Feb	0.11	28	3.08
March	0.83	31	25.73
April	2.07	30	62.10
May	2.76	31	85.56
June	4.12	30	123.60
July	4.68	31	145.08
August	3.95	31	122.45
September	2.65	30	79.50
October	1.41	31	43.71
November	-0.21	30	0.00
December	-0.78	31	0.00

PLEASE NOTE: The seasonal average for precipitation deficit should not be used for calculations because precipitation often exceeds evaporation during wetter months of the year. If the pond is kept full, excess precipitation during wetter months does not serve to refill the pond during drier months.

For example, see Sandpoint KSPT (NWS -- 108137), the annual precipitation deficit is -106 mm. However, April through September have positive precipitation deficit values. To properly estimate the annual volume of water necessary to refill a pond due to evaporation losses, the table will automatically enter a zero (0) for each month that the precipitation value is reported as a negative value.

As described above, precipitation offsets evaporation in winter months, so the net effect is that wintertime precipitation deficit is usually zero.

Total mm/year = **690.81**

$$\left(\frac{690.81}{304.8} \right) \times 10.80 = 24.5 \text{ AFA}$$

Total Storage Calculations

FILE NUMBER	63-
REVIEWER	SPF
DATE	7/22/2020

This spreadsheet has been designed by Idaho Department of Water Resources to estimate the total seepage, evaporation and fill capacity required for a pond.

User Input
Calculated value
Formula Explanations

Surface Area (AC.)	10.8	"Surface Area" is automatically carried over from the "Seepage Loss" sheet.
Average Pond Depth (FT.)	15.0	"Average Pond Depth" depicts the actual depth of the pond either measured or estimated. Note: If you know the maximum depth and not the average depth, the Field Examiner's Handbook suggests multiplying the maximum depth by 0.4 to get the average depth, or you can use any method that seems reasonable to attain average depth.
Pond Capacity (AF)	162	Pond Capacity is calculated by multiplying the Pond Surface Area by the Average Pond Depth. If you know the capacity, divide the capacity by surface area and enter the average pond depth in the space above. Note: If pond capacity is determined using a method shown on the "Pond Capacity" sheet, the user may need to modify the value of "Pond Capacity" (cell B9) manually. Note that if the value is modified manually, the formula will be altered for future use.
Multiple Fill Volume Above Initial Fill to Fulfill From Storage Needs- "Multiple Fills" (AF)	0	The "Multiple Fill Volume Above Initial Fill" is the acre-feet of water required to meet a <i>from storage</i> component if the <i>from storage</i> component exceeds a one time fill. This section should not include the amount of water needed to fill the pond initially or the amount of water needed to maintain the pond level due to evaporation or seepage. For example: if a pond has a capacity of 5 acre feet and 2.5 acre feet of seepage and evaporation, but the pond is used for irrigation that requires 10 acre feet of from storage for the irrigation use, then you would insert 5 acre feet into this location (10 acre feet needed - 5 acre feet from the initial fill = 5 acre feet of additional storage needed). Note: You must have a "From Storage" component exceeding the initial fill on the permit to include a volume in this space.
Estimated Seepage Loss (AF)	0.0	The "Estimated Seepage Loss" is automatically carried over from the "Seepage Loss" sheet.
Estimated Evaporation Loss (AF)	24.5	The "Estimated Evaporation Loss" is automatically carried over from the "Evaporation Loss" sheet.
Total Volume Required (AF)	186.5	The "Total Volume Required" is calculated by adding the Pond Capacity, Multiple Fills, Seepage Loss, and Evaporation Loss amounts to determine the total amount of storage required.

Re: Application for Permit No. 63-34954

Dear Interested Party:

The above referenced application may be of interest to you. I would like to inform you that the application has been submitted to the *Idaho Statesman* for advertising. I enclosed a copy of the application for your convenience. This information is also available on our website www.idwr.idaho.gov.

If you wish to formally protest the approval of the application, you must submit a protest with the \$25.00 protest fee to this office by **5:00 p.m., November 23, 2020**. You must also send a copy of your protest to the applicant.

If you have any questions regarding the application, please contact this office at 208-334-2190.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Anna Kaiser'.

RE: Application for Permit No. 63-34954

Dear Applicant(s):

The Department of Water Resources has received your water right application. Please refer to the number referenced above in all future correspondence regarding this application.

A legal notice of the application has been prepared and is scheduled for publication in the IDAHO STATESMAN on 11/5/2020 and 11/12/2020. Protests to this application may be submitted for a period ending ten (10) days after the second publication.

If the application is protested, you will be sent a copy of each protest. All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, the Department will process your application and notify you of any action taken on the application. If your application is approved, the Department will send you a copy of the permit.

Please contact this office if you have any questions regarding the application.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Anna Kaiser'.

**NOTICE OF PROPOSED CHANGE OF WATER RIGHT
TRANSFER NO. 84376**

NEW UNION DITCH CO LTD, PO BOX 31, EAGLE, ID 83616 has filed Application No. 84376 for changes to the following water rights within ADA County(s): Right No(s). 63-146; to see a full description of these rights and the proposed transfer, please see <https://research.idwr.idaho.gov/apps/waterrights/querynewtransfers>. The purpose of the transfer is to change a portion of the above rights as follows: New Union Ditch Co. LTD is an irrigation water provider for its district in northern Ada County. The company filed transfer 84376 to change the nature of use of a portion of water right 63-146's irrigation use to aesthetic storage to provide mitigation for evaporative losses from four ponds in the Renovare Subdivision. The source of the water for the ponds is shallow ground water assumed to be in hydraulic connection with the adjacent Boise River.

Permits will be subject to all prior water rights. For additional information concerning the property location, contact the Western office at (208)334-2190; or for a full description of the right(s), please see <https://idwr.idaho.gov/apps/ExtSearch/WRApplicationResults/>. Protests may be submitted based on the criteria of Idaho Code § 42-203A. Any protest against the approval of any application must be filed with the Director, Dept. of Water Resources, Western Region, 2735 W AIRPORT WAY, BOISE ID 83705-5082 together with a protest fee of \$25.00 for each application on or before 11/23/2020. The protestant must also send a copy of the protest to the applicant.

Subject: *Application for Permit – Renovare HOA Inc.*
Application for Transfer – New Union Ditch Co.

Dear Patrick,

Enclosed on behalf of Renovare HOA, Inc., is an *Application for Permit* requesting aesthetic storage from shallow ground water for ponds near Eagle. Consumptive use resulting from the ponds will be mitigated with Boise River water from New Union Ditch Company as proposed under the *Application for Transfer* also enclosed.

Check No. 015366 for \$890 is enclosed for the filing fees; \$290 for the permit application and \$600 for the transfer application. Thank you very much for your consideration and assistance in this matter. Please call me if you have any questions.

Sincerely,

A handwritten signature in cursive script that reads "Lori Graves".
