4. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.

6. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☐ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.** For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)
51-2151B	irrigation	1.98 cfs	300	60				
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL			
						CFS	AF	AC

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☒ No ☐

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. If space below is insufficient, attach a separate page and label it **Attachment 4C**:

Memorandum

To: Water Right 51-2151B
From: Justin Ferguson
Date: August 6, 2020
Re: Water Supply Bank Rental Application 1757

Purpose/Narrative: An application was received in person from Mr. Mori July 24, 2020 as part of a lease/rental package to use his existing water right for stockwater usage, rather than the irrigation component it was initially decreed for.

Prior to the lease/rental package, an attempt had been made to irrigate the acreage however, it proved to be unsuccessful. During an in-person visit Mr. Mori affirmed that he no longer planned to irrigate the acreage and intended to use the water right for livestock instead.

Authority to File: Both the lease and rental applications were signed and submitted, in person, by Mr. Mori. Current IDWR records indicate he is the current water right holder and, as such, is able to propose the package. No concerns at this time.

Water Right Validity/Forfeiture Evaluation: The water right being used for this rental is valid and being offered for lease to the Bank for the same duration as the rental. No concerns at this time.

Injury Evaluation: No injury is apparent through the rental as the water will be used at the historic place of use designated in the decree. While there does not appear to be much use of the water right past the attempted irrigation in 2016, the rental can move forward as the beneficial use accomplished through the rental is stockwater and any water used by the livestock will be directly returned to the water right place of use. Should a rental be proposed for the remaining acreage with a higher than minimal consumptive use, a review of Mr. Mori's past irrigation practices may be warranted.

Enlargement of Use: Based on the information provided in the application package, Mr. Mori intends to use the water for stock for the entire year. Because he will be limited to a total volume, there should not be enlargement, provided Mr. Mori stays at or below the total volume being rented.

Because the consumptive use of stockwater is generally accepted as minimal, there does not appear to be any case for enlargement through the rental. As previously stated, should a rental be proposed for the remaining acreage with more than a minimal consumptive use, a review of Mr. Mori's prior irrigation practices may be warranted to prevent enlargement.

Local Public Interest: Staff are unaware of any local public interests that are averse to the rental.

Beneficial Use/Conservation of Water Resources: Irrigation is a beneficial use. The rental appears consistent with the conservation of water resources in Idaho.

Department/Watermaster Comments: IDWR Western Region comments were requested on September 16, 2020, no concerns were received.

Water Supply Bank Evaluation: Bank staff recommend the approval of this application through the end of 2024.
