Hi Jana,

Here is the shape file for the 206 map update for Hagerman Wings. Could you please update the shape for any associated water rights and then make sure the clerical staff gets a copy of the map and the email below to scan to the WR backfile.

Thanks,
Nathan

Hi Nathan,

Here is the 206 map and shapefiles along with the waiver requests for the measuring devices.

Let me know if you have any questions.

Thanks,
Erick

Hi Nathan,

I apologize for the delay. I am participating in a sensitive project in Nevada and had hard deadlines to provide comments on the Draft Environmental Impact Study that was released for public review. That has eaten away most of my time the last few weeks.

Thanks for your email and outlining the action items for Hagerman Wings Farm. I have prepared the waiver request and contacted John to have him or his ranch manager sign requests. I hope to have those by the end of the week. John and I also spoke about the lack of a "206" map for the water right combination of 36-98, 36-15467, and 2-10338. I provided

him a map to indicate which ground the 121 acres are appurtenant to. I also expect to have those by the end of the week.

Again, I'm sorry for the delay, but we will get this resolved as soon as we can.
Thanks,
Erick

Hi Eric,

I was out yesterday morning at Hagerman Wings with John Shaw, Frank Erwin, and others looking at measuring devices and other items of interest. Frank wanted to make sure the correct measurement is in place for when we need to license the water rights. John Shaw may be contacting you also but he asked that I talk to you about what we observed.

Permits 36-17069 and 36-17116 have requirements for installing a measuring device. Currently neither permit is being measured by an industry standard open channel device. I recognize there are some difficulties for measurement and we can discuss any questions or thoughts you might have. If you chose to use a non-standard measuring device I would ask that you submit a variance request for the device (<https://idwr.idaho.gov/files/forms/request-for-variance-or-extension-of-time-surface-water.pdf>). You might find guidance for minimal acceptable standards helpful also, see <https://idwr.idaho.gov/files/water-measurement/Measuring-Devices-Minimum-Acceptable-Standards.pdf>.

Water rights 36-98, 36-15467, and 2-10338 have a condition that requires a specific 121 acres to be identified for irrigation. Currently the department's records show a 202 acre shape in GIS. I looked at past documents to see if we had missed updating it but could not find that a 121 acre shape had ever been submitted. We ask that you work with Mr. Shaw to provide the Department with a shape file of the 121 acres irrigated under these water rights.

Please let me know if you have any questions.

Thanks,
Nathan
