Subject: FW: Transfer #81560

Patrick,

I have attached the email string from Greg regarding the Frank Tiegs water rights 206 shape, as well as two photos, one PDF, and the components to the shapefile. Please ask an agent to update the shapes in arc map for the 25 irrigation rights associated with X81560 to the shape in the attached shapefile . Also, please ask the agent to print these photos, the PDF document, and this email to give to Kensie to scan and profile to each of the 25 water rights.

Thanks,

Nick.

Nick,

I received these pictures from the farm manager. These pivot stops are on Pivot R-17.

Subject: RE: Transfer #81560

Nick,

See that attached scanned documents and shape files for the 2020 place of use of 4,692.8 acres. Fields R-9, 2W, 9W and 10W have not been irrigated during the 2020 irrigation season. Fields 2W, 9W and 10W were planted in wheat and dry farmed for 2020. No crops were planted in R-9. Pivots RJ 1 and RJ 2 utilized swing arms during the 2019 irrigation season. During the winter months, the swing arms on these two pivots were removed. In the 2019 aerial, there was more irrigation occurring under these two pivots. Pivots RJ 3 and RJ 4 are currently utilizing swing arms. The swing arms will be removed after the alfalfa crop located on these two fields are rotated off probably this winter or the winter of 2021. I talked with the farm manager today regarding field R-17. A crop of field corn has been planted on $\frac{3}{4}$ of the pivot. The pivot has swung across the rocky non-farmable ground in the SW $\frac{1}{4}$ of the pivot. I told the farm manager that pivot stops need to be installed where the farmable ground stops. He indicated that he would install the pivot stops over the next few days. I will follow up with him next week and hopefully provide you with some pictures for verification.

Subject: RE: Transfer #81560

Greg,

The transfer approval requires submittal of a shape identifying the specific acres under the transfer. Do you have a .shp file you can send me that outlines the 4692.8 acres being irrigated under transfer 81560? I think the areas is green on the attached map constitute that shape, but I don't know for sure. Please send the shape in to me when you get it, as we have received some complaints about "excess irrigation" in the area and, while I don't think the complaints are well-founded with respect to Tiegs, having the specific shape is helpful.... And it is required as a condition of the transfer.

Hope all is well with you,

Nick.
