Attorneys for Bledsoe-Connor Holdings LLC

**BEFORE THE DEPARTMENT OF WATER RESOURCES
OF THE STATE OF IDAHO**

IN THE MATTER OF:

APPLICATION FOR TRANSFER NO.
81-12025 IN THE NAME OF BLEDSOE-
CONNOR HOLDINGS LLC

**BLEDSOE-CONNOR HOLDINGS
LLC'S PETITION FOR
RECONSIDERATION**

COMES NOW the Applicant, Bledsoe-Connor Holdings LLC. ("Bledsoe-Connor"), by and through its attorneys of record, Barker Rosholt & Simpson LLP, hereby files this Petition for Reconsideration of the Permit Approval for Water Right No. 81-12025. This Water Right is located on Colt Killed Creek, a tributary to the Locsha River. This tributary is located upstream of that section of the Locsha River which has been designated as a Wild and Scenic River. The permit is for irrigation of 6 acres with a total diversion rate of 0.12 cfs or 0.02 cfs/acre.

Applicant Bledsoe-Connor objects to the provision of condition 10 in the permit which states "water shall not be diverted under this right when flows in the Lochsa River are below minimum flow amounts as defined by right 81-10513" and requests that the Department reconsider the decision to include that portion of condition 10 in the permit.

Water Right 81-10513 was decreed to United States of America as a federal reserved water right in the SRBA. It is an instream right with discharge rates established for two-week blocks of

time during the entire year. Significantly, the decree for the Wild and Scenic Water right No. 81-10513 contains certain conditions of approval limiting the scope of that water right. One of those conditions of approval is found on Section 10 which defines other provisions necessary for the administration of the water right. Section b, sub part (5) of Section 10 provides that this federal reserved water right is subordinated to 40 cfs and 500 acres of irrigation of future development. Bledsoe-Connor's water permit falls within the scope of Section 10.b.(5) of the Water Right, 81-10513. This permit 81-12025 and the other water permits issued to Bledsoe-Connor are well within the 40 cfs and 500 irrigated acres of subordination. IDWR's proposed permit for right 81-12025 does not recognize that subordination. Instead the condition on the permit states that this water right cannot be diverted when the flows set forth in 81-10513 are not being met. However this flat prohibition on diversion is not consistent with the subordination provision of 81-10513. Bledsoe- Connor is not aware of any evidence in the department files establishing that the subordination provision in 81-10513 has been entirely consumed by other post-decree water rights. Therefore the subordination provision in condition 10 of 81-1023 should be eliminated.

DATED this 26th day of August, 2020.
