8. Acceptance of a right into the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other Department application process.
9. In accordance with Idaho Code § 42-248 and § 42-1409(6), all owners of water rights are required to notify the Department of any changes in mailing address or change in ownership of all or part of a water right. Notice must be provided within 120 days of the change.

  - a. Rental payments will go to the lessor(s) of record at the beginning of the rental season, even if the Department processes a Notice of Change in Water Right Ownership during the rental season.
  - b. New lessor(s) of record will receive payment for any subsequent rental seasons.
11. The water right(s) is leased to the bank subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.

#### Water Bank Lease Item 4A.

Water rights 2-10318, 2-10562, 2-2156, 2-2245A, 2-7055 and 2-7112A, when combined, allow irrigation of 1278 acres within a 1338-acre permissible place of use per transfer no. 82917 approved August 21, 2019. The irrigation place of use has changed over time due to the installation of pivots resulting in a more efficient irrigation system and less acres irrigated. Applicant's plan to only irrigate 950 acres during the requested three year lease period resulting in 328 remaining acres that they want to protect from forfeiture. As a result, they wish to lease all of right 2-7112A (152 acres) and 176 acres of water right 2-7055 to the bank.

#### Water Bank Lease Item 4G.

All the combined water rights (except 2-10318) were decreed in 2012. Water right 2-10318 was decreed in 2009 and was granted an approved *Extension of Time to Avoid Forfeiture* in 2016, protecting the right until 7/1/2020. The remaining rights, including 2-7112A and 2-7055, were granted approved *Extensions of Time to Avoid Forfeiture* in 2018, protecting them until 12/31/2023.

**Subject: Water Bank Lease Contract 1216**

Dear Justin,

Enclosed is water bank lease contract 1216 with two signed signature pages. Please note, signature and date lines for the applicant were not included on the contract document.

As clarified in your email, the applicant understands irrigation can still continue on the designated lease acres using the unleased portions of the water rights as long as the combined conditions and any applicable contract conditions are observed.

Thanks for your assistance in this matter Justin.

Sincerely,

Lori Graves

### RE: APPLICATION TO LEASE WATER RIGHT 2-7055 & 2-7112A TO THE WATER SUPPLY BANK CONTRACT 1216

\*\*\*\*TIME SENSITIVE RESPONSE REQUIRED\*\*\*\*

Dear Applicant:

The Department of Water Resources has completed its review of your application to lease the above-mentioned water right to the Water Supply Bank. **I have enclosed two original Water Supply Bank Lease Contracts for your review and signature. Please sign and return ALL Lease Contracts within 14 days.** Upon signature and return of the contracts, the Department will also sign the original contracts and return an executed copy to you. The Lease Contract is not considered final until you and the Department have both signed.

The right will automatically be released from the Bank on **December 31, 2023**, unless the right is released earlier by the Board, or upon your request. To release the right from the Bank prior to the release date, submit a written request on the Request to Release a Water Right from the Bank form. To propose a new lease period, submit a new Application to Sell or Lease a Water Right to the Water Supply Bank form along with applicable fees to the Department. These forms are available from any IDWR office or from our public website at <http://www.idwr.idaho.gov>. Please note your right may not be available for immediate release if it has been rented.

Please review the conditions of acceptance listed on the Lease Contract, including #3 which says:

"While a right is in the bank, **the lessor may not use the right** without approval of the department even if the right is not rented from the bank. Any violation of the terms of this lease may result in enforcement procedures pursuant to Idaho Code § 42-351 for illegal diversion and use of water and may include civil penalties pursuant to Idaho Code § 42-1701B."

If you have questions regarding this matter, please contact this office at [bank@idwr.idaho.gov](mailto:bank@idwr.idaho.gov) or 208-287-4800.

Sincerely,

# Memorandum

**To:** Water Rights 2-7055 & 2-7112A  
**From:** Justin Ferguson  
**Date:** June 4, 2020  
**Re:** Water Supply Bank Lease Application 1737

**Purpose/Narrative:** An application was received on behalf of Mr. and Ms. Atkins on May 21, 2020, offering a portion of water rights 2-7055 & 2-7112A for lease to the Bank through 2023. A prior application was received by the Department however, it was determined at that time, the rights were currently protected by an extension of time to avoid forfeiture already issued to the Atkinsons, effective through the end of 2023.

**Authority to File:** Review of IDWR records indicate that Mr. and Ms. Atkins are the current water right holders. No concerns at this time.

**Water Right Validity/Forfeiture Evaluation:** These water rights are currently being protected from forfeiture under an extension of time to prevent forfeiture until 2023. Prior to the extension, it appears the applicant's had taken action in the sixth year to prevent forfeiture as the rights were decreed in 2012 and the extension filed in 2018. Unlike a Water Supply Bank lease, where possession is taken of the right, no action is required by the Department other than administrative processing. As such the water rights remain valid and available for lease.

**Injury Evaluation:** No injury is apparent through a lease of these water rights. Taking into account the associated combined limits with these rights it appears there will not be any rate available for rent for the duration of the lease.

**Enlargement of Use:** No enlargement is evident through the lease, based on the combined limits associated with the water rights, it appears there will not be any rate available for rent. Because the Atkins' do not own all the rights associated with the combined limits, the unowned water rights must be taken out, at full, prior to determining what is available to Mr. and Ms. Atkins. The Bank cannot restrict water rights not held to the Bank and, as the Atkins' do not own the additional rights, cannot lease them or restrict their usage.

Further, the acreage being offered for lease will not continue to receive water under rights held by the Atkins'. Provided the water rights are not rented there are no concerns of enlargement.

**Local Public Interest:** Sustainable ground water management is within the local public interest.

**Beneficial Use/Conservation of Water Resources:** The lease appears consistent with the conservation of water resources in Idaho.

**Department/Watermaster Comments:** Comments from Western Regional manager were requested 8/8/2020, no concerns were received.

**Water Supply Bank Evaluation:** Based on the information presented by the applicant, staff recommends the application be approved.

**Subject: Water Bank Lease Applications, Water Rights 2-7112A (all), 2-7055 (part)**

Dear Justin,

Enclosed are two water bank lease applications for Jacoba and Clay Atkins. The Atkins wish to lease all of water right 2-7112A and part of water right 2-7055 to the bank for the three years. Both rights are part of a group of rights that when combined allow irrigation of 1278 acres within a 1338-acre permissible place of use (per recently approved transfer no. 82917).

The irrigation place of use has changed over time due to the installation of pivots resulting in a more efficient irrigation system and less acres irrigated. As shown on the attached aerial photo map, applicant's plan to irrigate 950 acres of the authorized 1278 acres during the 2020 irrigation season resulting in 328 unused acres that they want to protect from forfeiture. GIS shape files for the 950 acres shown in the aerial photo map can be provided upon request.

Because water rights 2-7112A and 2-7055 are the most junior in priority, they were the rights chosen to bank. The enclosed map for the lease applications identifies the 950 acres within the authorized permissible place of use that are planned for irrigation during the requested lease period.

As you recall, these applications were previously submitted in October, 2019, then returned since the subject rights were protected from forfeiture through 2023. However, for peace of mind, the applicants would like the acres leased and protected in the Idaho Water Supply Bank.

Check no. 14285 is enclosed for \$500 filing fee. Please let me know if there are any questions. Thanks Justin.

Sincerely,

Lori Graves
