Subject: Amendment of Permit 63-33864
Attachments: Amendment and cover letter 63-33864

Hello Scott,

Here is the amendment of permit for 63-33864. I have sent the amendment out to the permit holder this morning. If you have any questions, please don't hesitate to contact me. Since this is the same system as 63-34330, we are going to hold off licensing 63-34330 until we receive the amendment back.

Thank you.

Dan

Hi Dan,

The permitted volumes were based on design excavation plans.

A few of the pond 'footprints' were smaller, and one a little larger, than plans used in the permit process.

When I talked with the owner/developer on this, I understand that pond depths were as planned with a few adjustments to the surface area. I felt it appropriate to use the permitted & designed volume/(area x max depth) ratio to adjust recommended volume when aerial extent had changed. Attached is the spreadsheet.

Please feel free to call or let me know if you have other questions on this one.

Thank you,
Scott

Hi Scott,

I am reviewing 63-33864, and I am trying to figure out how where you came up with the volume multipliers in your spreadsheet. The multipliers are different than what was submitted in the permit, and some of them are bit different than the Department's standard of average pond depth is 2/5 or 0.4 of maximum depth. I was curious how you came up with the multiplier number.

Hi Scott,

This sounds good. The files are being reviewed to see if proof is acceptable. After they are done, they will be given to me. I have several things on my desk right now, but I will get to them as soon as possible.

Dan

Hello Dan,

Attached are POU and POD shapefiles for two Beneficial Use Field Exams that I dropped off today. The owners are ready to convey the rights to the HOA once the license are issued and asked me to request moving these ones along faster if possible.

Thank you,
Scott
